AUTHOR INDEX

AARNISALO, K., Automated ribotyping and PFGE typing of *L. monocytogenes*, 249
ABARCA, M. L., *A. carbonarius* as source of ochratoxin A in dried vine fruits, 504
ABBOTT, S., see Winthrop, 13
ABEE, T., see Luppens, 1393
ABRUNHOSA, L., see Serra, 2355
ACCENSI, F., see Abarca, 504
ACKERMAN, S. J., see Duff, 2103
ACUFF, G. R., see Castillo, 775
ADAMS, M. R., see Falahee, 1724
ADHIKARI, C., see Jackson, 618
AERTSEN, A., see Wuytack, 31
AGRIMI, U., see Frezza, 103
AHN, H. J., see Song, 1090
AJMONE-MARSAN, P., see Frezza, 103
ALLEN, R. I., see Beuchat, 1459
ALOCILJA, E., see Younts, 1455
ALONSO-CALLEJA, C., see Capita, 61, 65
ALPERTUNGA, B., see Özhan, 1510
ALTHAUS, R., Accuracy of BRT and Delvotest, 473
ALTHAUS, R. L., see Berruga, 2097
ALTIERI, C., see Sinigaglia, 2216
ALVAREZ, G., Acid and bile juice response in *V. cholerae*, 2283
AN, H., see Kim, 1385
ANDERSON, G. L., Interactions of *C. elegans* with soil microfauna, 1543
ANDERSON, G. L., see Caldwell, 1964
ANDERSON, K. E., see Jones, 1486
ANDERSON, R. C., see Callaway, 194; Genovese, 1353; Jung, 660
ANDERSSON, M. A., see Jääskeläinen, 1047
ANDREWS, W. H., see Valentín-Bon, 1670
ANKLAM, E., see Frezza, 103
ANNAMALAI, T., see Vasudevan, 497
ANSORENA, D., see Conchillo, 840
ANTONIOLLO, P. C., *Listeria* spp. on lamb carcasses, 328
ARAÚJO, C., Essential oils activity against food spoilage yeasts, 625
ARKOUDELOS, J. S., *S. aureus* and *Salmonella* Enteritidis survival on salted sardines, 1479
ARNOLD, J. W., see Boothe, 94
ARTHUR, T. M., see Barkocy-Gallagher, 1978
ARVOLA, A., see Miettinen, 1832

SUBJECT INDEX

A-1 medium
A-1 medium minus salicin, 120
Abattoir
E. coli O157 diversity and drying, 780
Microbial quality of ostrich carcasses, 878
Prevalence of *Salmonella* in cull sows, 1134
Acetic acid
Comparison of fog and foam sanitization procedures, 592
Stress tolerance of *S. enterica* serovar Typhimurium DT104, 1115
Acid adaptation
Sanitizer treatment of acid-stressed *E. coli* O157:H7 biofilms, 2258
STX production by *E. coli* O157:H7, 970
Survival of *Salmonella* on beef jerky during storage, 396
Acidic electrolyzed water
Bacterial inoculation methods of fresh produce, 2010
Acidified sodium chlorite
Reducing *L. monocytogenes* on salmon, 812
Acid resistance
Effect of gastric acid on foodborne pathogens, 1292
Acid shock
Acid and bile juice response in *V. cholerae*, 2283
Acid tolerance
Acid tolerance among antimicrobial-susceptible and -resistant *Salmonella*, 732
L. monocytogenes on decontaminated fresh beef, 985
Activation
High-pressure treatment of *T. macrosporus* ascospores, 1035
Activation energy
Modeling quality loss in poultry, 280
Aerobic plate count
Microbes in river lampreys, 2332
Microbiological monitoring of sheep carcass contamination, 946
Aflatoxin
Aflatoxin decontamination with clinoptilolite in feed for laying hens, 860
Aspergillus ear rot and aflatoxin in corn hybrids, 637
Counting and detection of aflatoxin-producing molds, 311
Mycotoxins in fruit products, 1514
Reduction of aflatoxin toxicity by Korean soybean paste, 866
Aflatoxin B_1
Adsorption and desorption of AFB_1 by bacteria, 426
Aflatoxin contamination in shrimp feed, 882
Antigenotoxic effects of Korean soybean paste, 431
Aflatoxin biosynthesis
Evaluating a reporter gene construct as a resistance-screening tool, 1927
Aflatoxin M_1
AFM_1 in Mexican milk, 1885
Aflatoxin reduction
Aflatoxin reduction, 1879
Agri-food surfaces
Chemical inactivation of hepatitis A virus, 115
Air chilling
Microbiological baseline for air-chilling poultry operations, 272
Alfalfa
E. coli O157:H7 and *Salmonella* on alfalfa seed, 1158
Irradiation control of *E. coli* O157:H7 and *Salmonella* on alfalfa seed, 175
Alfalfa seeds
Chemical and irradiation treatments for seeds, 767
Ozonation of alfalfa seeds and sprouts, 44
Alfalfa sprouts
EO water for inactivation of *Salmonella* on alfalfa sprouts, 208
Inactivation of *Salmonella* on alfalfa seeds, 2017
Ozonation of alfalfa seeds and sprouts, 44
Survey of sprouts and mushrooms, 182
Alginate
Rapid coliforms detection method, 2146
Alicyclobacillus acidoterrestris
Growth of *A. acidoterrestris* spores, 2216
Allyl isothiocyanate
Inhibition of *E. coli* O157:H7 in ground beef, 2038
Alternaria toxins
Mycotoxins in fruit products, 1514
Analytical methods
^{14}C-fumonisins in muffin processing, 1873
Anaphylaxis
Undeclared peanut protein in imported chocolates, 1932
Animal feces
Detection of fecal contamination with fluorescence, 1198
Animal feed
Simultaneous detection of prohibited materials in complete feed by PCR, 1085
Anisakis spp.
High hydrostatic pressure treatment of finfish, 1924
Annatto
Antimicrobial properties of annatto, 1074
Antagonism
Antagonism of *H. pylori* by bacteriocins, 3
Antagonistic action
Antagonism of pathogens in meat by lactobacilli, 418
Anthrax
B. anthracis and contamination of food, 691
Antibacterial activity
Antibacterial phenolic compounds, 1811
Sporicidal action of heated shell powder, 1482
Antibiotic residue
Antibiotic residue persistence in ewe's milk, 2097
Antibiotic resistance
Antibiotic resistance of bacteria from poultry products, 94
Enterococci in milk, beef, and chicken, 931
Integrons in poultry carcasses, 1426
Prevalence and antibiotic susceptibility of *Salmonella*, 1154
Antibiotics
Antibiotic resistance in *Micrococcaceae*, 937
Antimicrobial
Antimicrobial properties of annatto, 1074
Control of *C. perfringens* with organic acids, 1408
Antimicrobial activity
Antimicrobial activity of chitosan, 1495
Composition and activity of *Juniperus* oils, 1288
Essential oils activity against food spoilage yeasts, 625
Antimicrobial agents
E. coli O157:H7 inhibition by lysozyme and chelators, 1783
Antimicrobial effect
Effect of spices and herbs on *Shigella*, 668
Effects of potassium lactate and sodium diacetate on *Listeria*, 1469
Antimicrobial peptides
Outer membrane permeabilization by high pressure, 1360
Antimicrobial resistance
Acid tolerance among antimicrobial-susceptible and -resistant *Salmonella*, 732
Antimycotic
Investigating natamycin derivative's ability to prevent cheese molding, 1499
Antinutritional factors
Fermentation of cowpea flours, 2313
Apple
Reducing *Salmonella* on apples, 741
Apple cider
Patulin levels in apple cider, 618
Stress tolerance of *S. enterica* serovar Typhimurium DT104, 1115
Arcobacter
Arcobacter in retail meats, 1374
Characterization of *Arcobacter* isolates, 364
Arctic
Infectivity of *T. nativa* in country foods, 1857
Aroma
Salmonellae and citrus oils, 1704

Aromatic plants
Essential oils activity against food spoilage yeasts, 625
Array
Detection of SEB in food, 1851
Arsenic
Arsenobetaine in manufactured baby foods, 2321
Arsenobetaine
Arsenobetaine in manufactured baby foods, 2321
Artichoke
L. monocytogenes and *E. coli* O157:H7 in minimally processed artichokes, 2203
Ascorbic acid
Inactivation of *Salmonella* in dried apples, 2245
Ascospores
High-pressure treatment of *T. macrosporus* ascospores, 1035
Aseptic packaging
UV-peroxide killing of spores, 1233
Aspergillus
Aspergillus ear rot and aflatoxin in corn hybrids, 637
Counting and detection of aflatoxin-producing molds, 311
Aspergillus carbonarius
A. carbonarius as source of ochratoxin A in dried vine fruits, 504
Aspergillus spp.
Ochratoxin A–producing fungi in grapes, 633
Attachment
Attachment of *Salmonella* on tomatoes and tomatillos, 1756
Microscopic observation of *Campylobacter* on chicken skin, 2222
Attitudes
A review of consumer food safety studies, 130
Authenticity
Enantiomeric excesses of terpenes in juices, 1448
Autonomous nervous system
Role of ANS in transfer of PrP^{res}, 890
Available carbohydrates
Fermentation of cowpea flours, 2313
AviFree
CE products control the colonization of *Salmonella* in broilers, 490
Aviguard
CE products control the colonization of *Salmonella* in broilers, 490

Baby food
Arsenobetaine in manufactured baby foods, 2321
Bacillus
Bacillus heat resistance and hydrophobicity on stainless steel, 2070
Bacillus anthracis Sterne
Detection and fate of *B. anthracis* (Sterne) spores in raw milk, 2349
Bacillus cereus
Inactivation of *B. cereus* spores by HPP, 599
Quantitative assay for *B. cereus* emetic toxin in bakery products, 1047
Weibull-based inactivation model, 978
Bacillus spp.
Lethal effect of microwaves on *Bacillus* spp., 604
Bacillus subtilis
Sporicidal action of heated shell powder, 1482
Bacteria
Antibiotic resistance of bacteria from poultry products, 94
Rapid separation and concentration of bacteria in food, 1935
Bacterial counts
Microbial quality of ostrich carcasses, 878
Bacterial growth
Carcass-cooling processes, 1247
Bacterial identification
Rapid detection of *L. monocytogenes* in food products, 1658
Bacterial inactivation
Decontamination of seeds by HHP, 918
Outer membrane permeabilization by high pressure, 1360
Ultrasound and heat decontamination, 1642
Bacterial inoculation
Bacterial inoculation methods of fresh produce, 2010
Bacterial spores
Sporicidal action of heated shell powder, 1482
Bacterial survival
E. coli O157 diversity and drying, 780
Bactericidal effects
Konjac fluid effects on bacteria, 1822
Bacteriocin(s)
Antagonism of *H. pylori* by bacteriocins, 3
Bacteriocin toxicity to cultured mammalian cells, 847
Inhibition of *L. monocytogenes* in smoked salmon, 1420
Bacteriophage Felix O1
Bacteriophage-mediated control of *Salmonella* in poultry frankfurters, 220
Bactometer
Campylobacter detection, 1752
Bakery products
MAP for fungal prevention in cakes, 1864
Barotolerance
L. monocytogenes with different barotolerances, 2057
BAX
Survey of sprouts and mushrooms, 182
BAX PCR
Comparison of enrichment broths for recovery of freeze-injured *E. coli*, 1911
Beef
C. perfringens in cooling of cooked ham and beef, 1599
C. perfringens outgrowth in beef and pork during chilling, 501
Effect of chemical dehairing, 2005
Enterococci in milk, beef, and chicken, 931
Isolation of vancomycin-resistant *E. faecalis* from beef, 1845
Vacuum skin packaging of retail cuts of beef, 2085
Beef carcasses
Carcass-cooling processes, 1247
Beef carcass surfaces
Ozone treatment for beef carcass surfaces, 775
Beef cows
E. coli O157:H7 in southeastern beef cows, 1778
Beef jerky
Survival of *Salmonella* on beef jerky during storage, 396
Beef processing
Hand washing at a beef plant, 493
Behavior
A review of consumer food safety studies, 130
Bifidobacteria
Protection of nutraceutical bacteria, 2076
Bile
Protection of nutraceutical bacteria, 2076
Bile shock
Acid and bile juice response in *V. cholerae*, 2283
Biofilm
Antibiotic resistance of bacteria from poultry products, 94
Modeling biofilm formation, 1432
Sanitizer treatment of acid-stressed *E. coli* O157:H7 biofilms, 2258
Biogenic amines
Amines in dried and salted tuna roe, 335
Bioluminescence
Effect of diet on course of *Salmonella* infection in mice, 2160
Factors affecting growth of *Campylobacter*, 1190
Factors affecting survival of *Campylobacter*, 2032
Rapid bioluminescent method for *Salmonella*, 1996
Biopreservation
Inhibition of *L. monocytogenes* in smoked salmon, 1420
Biosensor
Biosensor for detection of *E. coli* O157:H7, 512
Detection of SEB in food, 1851
Biotyping
Porcine *Campylobacter* phenotyping, 1079
Bisphenol A
Bisphenol A migration from cans, 1444
Determination of bisphenol A in milk and dairy products, 1439
Blood

Detectability of genetically modified feeds in milk, 304
Bottled water
Enteroaggregative *E. coli* in bottled water, 497
Botulinum neurotoxin
Effect of ethanol on *C. botulinum,* 610
Bovine central nervous system
Bovine CNS tissue in meat and meat products, 644
Bovine spongiform encephalopathy
mtDNA detection in MBM, 103
Brine
Listeria monocytogenes in a brine chiller system, 1840
Broiler carcass
Weep and carcass rinse comparison for *Campylobacter* recovery, 1720
Broiler chicken
Effects of Jerusalem artichokes on broiler chickens, 2171
Broiler growth
Effects of Jerusalem artichokes on broiler chickens, 2171
Broiler operations
Campylobacter levels in 1995 and 2001 broiler operations, 1557
Broilers
CE products control the colonization of *Salmonella* in broilers, 490
Chlorine in commercial broiler chicken drinking water, 2164
Whole carcass enrichment, 446
BRT
Accuracy of BRT and Delvotest, 473
Buffered sodium citrate
Inhibition of *C. perfringens,* 376
Bulk milk
Prevalence and types of *L. monocytogenes,* 1413
Butter
Viability of pathogens in yellow fat products, 549

Caenorhabditis elegans
Attraction of *C. elegans* to foodborne pathogens, 1964
Interactions of *C. elegans* with soil microfauna, 1543
Calcium hypochlorite
Bean and green sprout production, 1253
Calcium oxide
Sporicidal action of heated shell powder, 1482
Calicivirus
Removal of microbes under fingernails, 2296
Calves
EHEC in weaned calves, 1184
Enterohemorrhagic *E. coli* in neonatal calves, 924
Camel milk
Thermal inactivation of *E. coli* in camel milk, 1708
Camembert cheese
Behavior of *L. monocytogenes* after heat stress, 265
Campylobacter
Campylobacter detection, 1752
Campylobacter in ready-to-eat foods, 2135
Campylobacter levels in 1995 and 2001 broiler operations, 1557
Electrical detection of *Campylobacter,* 1724
Factors affecting growth of *Campylobacter,* 1190
Factors affecting survival of *Campylobacter,* 2032
Lairage conditions and pathogens' survival, 1570
Microbiological baseline for air-chilling poultry operations, 272
Prevalence of *Campylobacter* in swine, 1550
Real-time PCR assay for *Campylobacter,* 1343
Viability of *Campylobacter* on chicken and pork skins, 2023
Weep and carcass rinse comparison for *Campylobacter* recovery, 1720
Campylobacter coli
Effect of chilling methods on pork carcasses, 1019
Recovery methods of freeze-injured pathogens on pork, 798
Campylobacter jejuni
Antibacterial phenolic compounds, 1811
Fluoroquinolone resistance mechanism in *C. jejuni,* 319
Methods for quantitative microbial risk assessment, 1900
Microscopic observation of *Campylobacter* on chicken skin, 2222
Pathogen transfer from stainless steel surfaces, 2231
Reducing *Campylobacter* by freezing, 652
Survival of *Campylobacter* and *Salmonella* on surfaces, 1587
Campylobacter spp.
Porcine *Campylobacter* phenotyping, 1079
Canned food
Bisphenol A migration from cans, 1444
Canola oil
Mutagenicity of fumes from fried chicken legs, 1269
Cantaloupe
Attraction of *C. elegans* to foodborne pathogens, 1964
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Cantaloupe sanitization, 1805
Capacitance
Campylobacter detection, 1752
Carbaryl
Carbaryl and napthol detection in fruit juice, 1510
O-carboxymethylated chitosan
Antimicrobial activity of chitosan, 1495
Carcass
Campylobacter levels in 1995 and 2001 broiler operations, 1557
E. coli O157 diversity and drying, 780
Effect of chemical dehairing, 2005
STEC and *Salmonella* prevalence in beef processing, 1978
Carcinogens
AFM_1 in Mexican milk, 1885
Carnobacterium piscicola
Inhibition of *L. monocytogenes* in smoked salmon, 1420
Carrots
Fecal contaminants on carrots, 88
β-Casein macropeptide
Inhibition of angiotensin converting enzyme by κ-casein macropeptide, 1686
Catalonia, Spain
PAHs in foods, 2325
Cations
Nisin and cations inhibit *L. monocytogenes,* 1631
Cattle
Competitive exclusion product to reduce *E. coli* O157:H7, 355
E. coli O157 contamination routes in a cattle slaughterhouse, 1564
Cd
Trace elements in Slovenian poultry tissues, 686
Cecal bacteria
Effects of Jerusalem artichokes on broiler chickens, 2171
Cell culture
Acid and peroxide treatment of *C. parvum* oocysts, 1650
Cereulide
Quantitative assay for *B. cereus* emetic toxin in bakery products, 1047
Cheese
Investigating natamycin derivative's ability to prevent cheese molding, 1499
Ozone disinfection, 2355
Chelators
E. coli O157:H7 inhibition by lysozyme and chelators, 1783
Chemical composition
Composition and activity of *Juniperus* oils, 1288
Chemical dehairing
Effect of chemical dehairing, 2005
Chemiluminescence
Biosensor for detection of *E. coli* O157:H7, 512
Chemokines
Modulation of epithelial cytokine production by lactic acid bacteria, 466
Chicken
Automated BAX *Salmonella* detection, 2138
Predictive models for growth of *Salmonella,* 200
Salmonella Enteritidis phage types in Brazil, 324
Chicken rinse water
Real-time PCR assay for *Campylobacter,* 1343
Chicken skin
Microscopic observation of *Campylobacter* on chicken skin, 2222
Children

Extraction of fumonisin mycotoxins, 854
Chill
Listeria monocytogenes in a brine chiller system, 1840
Chilled meats
Indicators of microbial quality of meat, 1733
Chilling
COP and lipid oxidation in raw and cooked chicken breast, 840
C. perfringens in cured meats, 72
C. perfringens outgrowth in beef and pork during chilling, 501
Inhibition of *C. perfringens*, 376
Chitosan
Antimicrobial activity of chitosan, 1495
Chlorate
Chlorate reduces *E. coli* O157:H7 populations in sheep, 194
Salmonella reduction by nitrate and chlorate, 660
Chlorine
Chlorine in commercial broiler chicken drinking water, 2164
Reducing *Salmonella* on apples, 741
Treatments for the natural microbiota of lettuce, 1697
Chlorine dioxide
Reducing *L. monocytogenes* on salmon, 812
Chloroplast
PCR for detection of *Enterobacteriaceae*, 1798
Chocolate
Undeclared peanut protein in imported chocolates, 1932
Cholerae toxin
Acid and bile juice response in *V. cholerae*, 2283
Cholesterol oxidation products
COP and lipid oxidation in raw and cooked chicken breast, 840
Chromogenic substrate
Evaluation of a chromogenic agar for detection of *L. monocytogenes*, 441
Cider
E. coli in apple cider and the cider production environment, 2237
Cilantro
Screening herbs for fecal indicator viruses, 1506
Citrobacter rodentium
Lactobacillus acidophilus attenuates hyperplasia, 457
Citrus peel oil
Salmonellae and citrus oils, 1704
Citrus-related products
E. coli O157:H7 and *Salmonella* on alfalfa seed, 1158
Cleaning cloths
Tolerance of pathogens to cleaning treatments, 2289
Cleaning system
Disinfection of poultry transport containers, 793
Clinoptilolite
Aflatoxin decontamination with clinoptilolite in feed for laying hens, 860
Clostridium
Control of clostridia in turkey, 1474
Clostridium botulinum
Effect of ethanol on *C. botulinum*, 610
Inactivation of *C. botulinum* by HPP, 1402
Inhibition of nonproteolytic *C. botulinum* with LAB, 674
Clostridium perfringens
Control of *C. perfringens* with organic acids, 1408
C. perfringens in cooked meat and poultry, 1227
C. perfringens in cooling of cooked ham and beef, 1599
C. perfringens in cured meats, 72
C. perfringens outgrowth in beef and pork during chilling, 501
Inhibition of *C. perfringens*, 376
Survival after ozone treatment, 382
Coccidial parasites
Passage of coccidial parasites through oysters, 679
Cold storage
Effect of essential oils on sea bass shelf life, 410
Coliforms
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Disinfection of poultry transport containers, 793
Rapid coliforms detection method, 2146
Combination preservation
Effect of spices and herbs on *Shigella*, 668
Compartmentalization
Persistent and nonpersistent *L. monocytogenes* contamination, 2062
Competitive exclusion
CE products control the colonization of *Salmonella* in broilers, 490
Competitive exclusion of *Salmonella*, 1353
Competitive exclusion product to reduce *E. coli* O157:H7, 355
EHEC in weaned calves, 1184
Enterohemorrhagic *E. coli* in neonatal calves, 924
Competitive PCR
mtDNA detection in MBM, 103
Compost
E. coli O157:H7 in compost, 25, 1771
Compressorium
Comparison of a modified digestion assay with trichinoscopy, 1043
Concentration
L. monocytogenes in RTE foods, 559
L. monocytogenes: low levels equal low risk, 570
Rapid separation and concentration of bacteria in food, 1935
Conductivity
PEF inactivation model for *E. coli*, 1007
Confocal scanning laser microscopy
Microscopic observation of *Campylobacter* on chicken skin, 2222
Consumer
Reducing *Salmonella* on apples, 741
Thermal destruction of *E. coli* O157:H7 in ground beef, 1030
Consumer food safety
A review of consumer food safety studies, 130
Contamination
Aflatoxin contamination in shrimp feed, 882
AFM_1 in Mexican milk, 1885
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
E. coli in apple cider and the cider production environment, 2237
Contamination routes
E. coli O157 contamination routes in a cattle slaughterhouse, 1564
Control
Parsley-associated *Shigella* and *E. coli* outbreaks, 535
Controlled fermentation
Fermentation of cowpea flours, 2313
Cook-chill
Inhibition of nonproteolytic *C. botulinum* with LAB, 674
Cooked meats
C. perfringens in cooked meat and poultry, 1227
Cooking method
Thermal destruction of *E. coli* O157:H7 in ground beef, 1030
Cooling
Carcass-cooling processes, 1247
C. perfringens in cooling of cooked ham and beef, 1599
Cooling procedure
Control of *C. perfringens* with organic acids, 1408
Corn
Aspergillus ear rot and aflatoxin in corn hybrids, 637
Corn-based foods
Extraction of fumonisin mycotoxins, 854
Corn kernel cultures
^{14}C-fumonisins in muffin processing, 1873
Cornmeal
ELISA for *Fusarium* species, 451
Cornmeal muffins
^{14}C-fumonisins in muffin processing, 1873
Cost-effectiveness
Preventing foodborne illness in the home, 2103
Cow
S. aureus enterotoxin from mastitic cows, 1693
Cowpea
Fermentation of cowpea flours, 2313
Cream-filled baked goods
Managing staphylococcal risk with FSOs, 1310

Critical leak size
Loss of hermetic seal as affected by microorganism characteristics, 1716
Cross-contamination
Cross-contamination of orange juice, 1490
E. coli cross-contamination, 1176
Cryotolerance
Irradiation and cryotolerance of *Salmonella,* 1916
Cull sows
Prevalence of *Salmonella* in cull sows, 1134
Cultured mammalian cells
Bacteriocin toxicity to cultured mammalian cells, 847
Cured meats
C. perfringens in cured meats, 72
Cyclodextrin
Counting and detection of aflatoxin-producing molds, 311
Cytokines
Modulation of epithelial cytokine production by lactic acid bacteria, 466
Cytotoxicity
Arcobacter in retail meats, 1374
Bacteriocin toxicity to cultured mammalian cells, 847

Daily intake
PCB intake from fish: evaluation of the dietary risk, 2176
Dairy
VTEC in food processing environments, 1576
Dairy ewes
Antibiotic residue persistence in ewe's milk, 2097
Death rate
Microbial interaction and death of *E. coli* in fermenting olives, 1166
Decay
Proteolytic fungi on raw tomatoes, 911
Decontamination
Disinfection of poultry transport containers, 793
Effectiveness of TSP on chicken skin, 61
L. monocytogenes on decontaminated fresh beef, 985
Dehydration
E. coli O157 diversity and drying, 780
Deli turkey breast products
Pasteurization of RTE turkey products, 1618
Delvotest
Accuracy of BRT and Delvotest, 473
Depletion time
Antibiotic residue persistence in ewe's milk, 2097
Depuration
Diacetyl-assisted depuration in oysters, 38
HAV persistence in oysters, 331
Salmonella serovars in live shellfish, 226
Desorption
Modeling biofilm formation, 1432
Detection
Automated BAX *Salmonella* detection, 2138
Campylobacter detection, 1752
Detection and fate of *B. anthracis* (Sterne) spores in raw milk, 2349
Detection of *Salmonella* spp. in raw milk, 1762
Improved PCR for *tdh* detection, 1675
Detection techniques
Detection of *E. coli* O157:H7 by gas sensors, 1455
Salmonella detection by fish, 723
Detergents
Produce rinse agents, 2210
Survival of pathogens in detergents, 1462
Detoxification
Aflatoxin decontamination with clinoptilolite in feed for laying hens, 860
Diacetate
Effects of potassium lactate and sodium diacetate on *Listeria,* 1469
Diacetyl
Diacetyl-assisted depuration in oysters, 38
Dietary intake
PAHs in foods, 2325
Digestion
Comparison of a modified digestion assay with trichinoscopy, 1043
Dip application
Phosphate dip for poultry, 1701
Direct-fed microbials
E. coli O157:H7 prevalence in cattle fed direct-fed microbials, 748
Disinfectants
Chemical inactivation of hepatitis A virus, 115
Fluorescent probes for viability assessment, 1393
Disinfection
Ozonation of alfalfa seeds and sprouts, 44
Ozone disinfection, 2355
Preventing foodborne illness in the home, 2103
Reduction of bacterial and viral pathogens on strawberries, 188
Treatments for the natural microbiota of lettuce, 1697
Distribution
A model to predict loss of hermetic seal in liquid food packages, 1260
Diversity
E. coli O157 diversity and drying, 780
DNA extraction protocols
Real-time PCR assay for *Campylobacter,* 1343
DNA probes
V. parahaemolyticus variability in oysters, 125
DNA transfer
Detectability of genetically modified feeds in milk, 304
Dormancy
High-pressure treatment of *T. macrosporus* ascospores, 1035
Dose-response model
L. monocytogenes: low levels equal low risk, 570
Dressing procedures
Role of ANS in transfer of PrP^{res}, 890
Dried apples
Inactivation of *Salmonella* in dried apples, 2245
Dried vine fruits
A. carbonarius as source of ochratoxin A in dried vine fruits, 504
Drinking water
Chlorine in commercial broiler chicken drinking water, 2164
Dry heating
Heating of egg white powder and *Salmonella,* 825
Dry-heat treatment
Chemical and irradiation treatments for seeds, 767
Dry sausages
E. coli O157:H7 survival in dry sausages, 2267
D-values
E. coli O157:H7 in compost, 1771

Ecology
B. anthracis and contamination of food, 691
Ecometric
Ecometric assessment of media, 1727
EDTA
E. coli O157:H7 inhibition by lysozyme and chelators, 1783
Listeria growth under stress, 1208
Efficacy test
Antimicrobial performance of alkaline ionic fluid (GC-100X), 1604
Egg
Aflatoxin decontamination with clinoptilolite in feed for laying hens, 860
Detection of Enteritidis in eggs, 1670
Reduction of aflatoxin toxicity by Korean soybean paste, 866
Salmonella Enteritidis detection, 1666
Salmonella Enteritidis in egg contents pools, 656
Egg wash water
Survival of *Salmonella* in waste egg wash water, 233
Egg white
Heating of egg white powder and *Salmonella,* 825
Eimeria
Passage of coccidial parasites through oysters, 679
Electric field

Inactivation of *S. cerevisiae* with RFEFs, 1712
Electrolyzed acidic water
Inactivation of bacteria on tomatoes by electrolyzed acidic water, 542
Electrolyzed oxidizing water
EO water for inactivation of *Salmonella* on alfalfa sprouts, 208
Stability and efficacy of EO water against pathogens, 1379
Electrolyzed water
Inactivation of *Salmonella* on alfalfa seeds, 2017
ELISA
ELISA for *Fusarium* species, 451
PCR-ELISA for *Salmonella* detection, 2367
Emetic toxin
Quantitative assay for *B. cereus* emetic toxin in bakery products, 1047
Enantiomeric distribution
Enantiomeric excesses of terpenes in juices, 1448
Encapsulation
Protection of nutraceutical bacteria, 2076
Endotoxin
Effects of Jerusalem artichokes on broiler chickens, 2171
Energy consumption
Ultrasound and heat decontamination, 1642
Enrichment
Rapid separation and concentration of bacteria in food, 1935
Screening herbs for fecal indicator viruses, 1506
Enrichment broths
Comparison of enrichment broths for recovery of freeze-injured *E. coli*, 1911
Enteric illness
Enteric illness in Ontario, Canada, 953
Enteric pathogens
Decontamination of seeds by HHP, 918
Enteric virus
HAV persistence in oysters, 331
Enteroaggregative *Escherichia coli*
Enteroaggregative *E. coli* in bottled water, 497
Enterobacteriaceae
Microbiological monitoring of sheep carcass contamination, 946
PCR for detection of *Enterobacteriaceae*, 1798
Enterobacter sakazakii
Virulence aspects of *E. sakazakii*, 370
Enterococci
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Enterococcus
Enterococci in milk, beef, and chicken, 931
Enterococcus faecalis
Isolation of vancomycin-resistant *E. faecalis* from beef, 1845
Enterohemorrhagic *Escherichia coli*
EHEC in weaned calves, 1184
Enterohemorrhagic *E. coli* in neonatal calves, 924
Enterohemorrhagic Shiga toxin–producing *Escherichia coli*
STEC and *Salmonella* prevalence in beef processing, 1978
Enterotoxigenic *Escherichia coli*
Parsley-associated *Shigella* and *E. coli* outbreaks, 535
Enterotoxin
Multiplex PCRs for detection of enterotoxigenic *S. aureus*, 1055
S. aureus enterotoxin from mastitic cows, 1693
Virulence aspects of *E. sakazakii*, 370
Enumeration
Enumeration of *Listeria* in poultry, 65
Environment
L. monocytogenes on RTE meats inoculated with a dustlike vector, 962
Environmental factors
Factors affecting survival of *Campylobacter*, 2032
Enzyme-linked immunosorbent assay
Grouper identification by ELISA, 886
Rapid MPN-based ELISA, 2302
Epidemiological methods
Guidelines for investigating foodborne disease outbreaks, 2343
Epinephelus guaza
Grouper identification by ELISA, 886
Escherichia coli
Antagonism of pathogens in meat by lactobacilli, 418
Antibacterial phenolic compounds, 1811
Carcass-cooling processes, 1247
E. coli in apple cider and the cider production environment, 2237
E. coli in growing spinach, 1790
Hand washing at a beef plant, 493
Microbial quality of ostrich carcasses, 878
Ozone treatment for beef carcass surfaces, 775
PEF inactivation model for *E. coli*, 1007
pH enhancement of lean beef trimmings, 874
Removal of microbes under fingernails, 2296
Survival after ozone treatment, 382
Thermal inactivation of *E. coli* in camel milk, 1708
Escherichia coli acid tolerance
Microbial interaction and death of *E. coli* in fermenting olives, 1166
Escherichia coli O157
E. coli O157 contamination routes in a cattle slaughterhouse, 1564
E. coli O157 diversity and drying, 780
E. coli O157:H7 and *Salmonella* on alfalfa seed, 1158
E. coli O157:H7 in produce, 18
Escherichia coli O157:H7
Antimicrobial performance of alkaline ionic fluid (GC-100X), 1604
Bacterial inoculation methods of fresh produce, 2010
Biosensor for detection of *E. coli* O157:H7, 512
Chemical and irradiation treatments for seeds, 767
Chlorate reduces *E. coli* O157:H7 populations in sheep, 194
Comparison of enrichment broths for recovery of freeze-injured *E. coli*, 1911
Competitive exclusion product to reduce *E. coli* O157:H7, 355
Cross-contamination of orange juice, 1490
Detection of *E. coli* O157:H7 by gas sensors, 1455
Detection of viable Shiga toxin–producing *E. coli*, 1277
E. coli cross-contamination, 1176
E. coli O157:H7 in compost, 25, 1771
E. coli O157:H7 inhibition by lysozyme and chelators, 1783
E. coli O157:H7 in produce, 18
E. coli O157:H7 in southeastern beef cows, 1778
E. coli O157:H7 prevalence in cattle fed direct-fed microbials, 748
E. coli O157:H7 survival in dry sausages, 2267
Effect of chemical dehairing, 2005
Effect of gastric acid on foodborne pathogens, 1292
Effect of lactate on thermal inactivation of *E. coli* O157:H7, 664
EHEC in weaned calves, 1184
Enterohemorrhagic *E. coli* in neonatal calves, 924
Inactivation of bacteria on tomatoes by electrolyzed acidic water, 542
Inactivation of pathogens in juice concentrates, 1637
Inhibition of *E. coli* O157:H7 in ground beef, 2038
Irradiation control of *E. coli* O157:H7 and *Salmonella* on alfalfa seed, 175
Irradiation control of *E. coli* O157:H7 and *Salmonella* on broccoli seeds, 760
Lairage conditions and pathogens' survival, 1570
L. monocytogenes and *E. coli* O157:H7 in minimally processed artichokes, 2203
Patterns of *E. coli* O157:H7 shedding over time by feedlot cattle, 1972
PEF and heat inactivation of stress-adapted *E. coli* O157:H7, 755
Persistence of *E. coli* O157:H7 on lettuce, 2198
Response of bacterial pathogens to ultraviolet energy, 1071
Sanitizer treatment of acid-stressed *E. coli* O157:H7 biofilms, 2258
Stress responses of *E. coli* O157:H7 during starvation, 2045
STX production by *E. coli* O157:H7, 970
Survey of sprouts and mushrooms, 182
Survival of pathogens in juice concentrates, 1595
Thermal destruction of *E. coli* O157:H7 in ground beef, 1030
Ultrasound and heat decontamination, 1642
Viability of pathogens in yellow fat products, 549
Essential oils(s)
Composition and activity of *Juniperus* oils, 1288
Effect of essential oils on sea bass shelf life, 410

Essential oils activity against food spoilage yeasts, 625
Estimated dietary intake
PCBs in foods from Catalonia, Spain, 479
Ethanol
Effect of ethanol on *C. botulinum*, 610
Ewe's milk
Accuracy of BRT and Delvotest, 473
Extraction solvents
Extraction of fumonisin mycotoxins, 854

Farm animals
Safety assurance for *Salmonella* spp. in Swiss food production, 1139
Farmed Atlantic salmon
Absence of nematodes in farmed Atlantic salmon in Norway, 122
Farms
Isolation methods of *Salmonella* on farms, 1987
Farm to fork
Safety assurance for *Salmonella* spp.: a semiquantitative approach, 1146
Fecal coliforms
A-1 medium minus salicin, 120
Salmonella serovars in live shellfish, 226
Fecal contamination
Detection of fecal contamination with fluorescence, 1198
Fecal indicator
Fecal contaminants on carrots, 88
Fecal shedding
Patterns of *E. coli* O157:H7 shedding over time by feedlot cattle, 1972
Feces
Detection of *Salmonella*, 518
STEC and *Salmonella* prevalence in beef processing, 1978
Feed
Aflatoxin contamination in shrimp feed, 882
Counting and detection of aflatoxin-producing molds, 311
Feedlot cattle
Patterns of *E. coli* O157:H7 shedding over time by feedlot cattle, 1972
Feedstuff
PCR assay for detection of animal tissue in feeds, 2307
Fermentation
Microbial interaction and death of *E. coli* in fermenting olives, 1166
Fermented meats
Genotoxicity of tremorgenic mycotoxins, 2123
Fermented milk
Effect of diet on course of *Salmonella* infection in mice, 2160
Fiber optic
Biosensor for detection of *E. coli* O157:H7, 512
Field practices
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Filaments
Salmonella filaments at 8°C, 215
Fine-emulsion sausage
Effect of ionizing radiation and diacetate on *L. monocytogenes*, 819
Finfish
High hydrostatic pressure treatment of finfish, 1924
Fingernails
Removal of microbes under fingernails, 2296
Fish
Mercury speciation in edible fish, 300
PCB intake from fish: evaluation of the dietary risk, 2176
Fish meal
Discriminant PCR for detection of terrestrial animals in fish meal, 682
flaA gene
Factors affecting growth of *Campylobacter*, 1190
Flow conditions
Modeling biofilm formation, 1432
Flow cytometry
Antibody evaluation combined with flow cytometry detection, 1283
Cytometric assay for staphylococcal enterotoxin B, 1222
Fluorescent probes for viability assessment, 1393
Fluorescence
Detection of fecal contamination with fluorescence, 1198
Fluorescent probes for viability assessment, 1393
Fluorescent in situ hybridization
Salmonella detection by fish, 723
Fluoroquinolones
Fluoroquinolone resistance mechanism in *C. jejuni*, 319
Foam sanitization
Comparison of fog and foam sanitization procedures, 592
Fog sanitization
Comparison of fog and foam sanitization procedures, 592
Food(s)
Multiplex PCRs for detection of enterotoxigenic *S. aureus*, 1055
PCR for detection of *Enterobacteriaceae*, 1798
Rapid separation and concentration of bacteria in food, 1935
Salmonella detection by fish, 723
Foodborne
Virulence aspects of *E. sakazakii*, 370
Foodborne bacteria
Renamed foodborne taxa, 1304
Foodborne disease
Bean and green sprout production, 1253
E. coli O157 diversity and drying, 780
Guidelines for investigating foodborne disease outbreaks, 2343
Preventing foodborne illness in the home, 2103
Reduction of bacterial and viral pathogens on strawberries, 188
Foodborne illness
Consumer behaviors associated with foodborne illnesses, 1893
Enteric illness in Ontario, Canada, 953
Foodborne infections
Parsley-associated *Shigella* and *E. coli* outbreaks, 535
Foodborne pathogen(s)
Antimicrobial performance of alkaline ionic fluid (GC-100X), 1604
Attraction of *C. elegans* to foodborne pathogens, 1964
Consumer behaviors associated with foodborne illnesses, 1893
Enteric illness in Ontario, Canada, 953
Interactions of *C. elegans* with soil microfauna, 1543
Irradiation of *L. monocytogenes* on endive, 993
STEC and *Salmonella* prevalence in beef processing, 1978
Food concentrations
PAHs in foods, 2325
Food contact surfaces
Survival of *Campylobacter* and *Salmonella* on surfaces, 1587
Food-handling behaviors
Consumer behaviors associated with foodborne illnesses, 1893
Food industry
Automated ribotyping and PFGE typing of *L. monocytogenes*, 249
Food irradiation
Irradiation control of *E. coli* O157:H7 and *Salmonella* on alfalfa seed, 175
Irradiation of oysters, 1025
Food poisoning
TTX-associated snail poisoning, 110
Food-poisoning bacteria
Konjac fluid effects on bacteria, 1822
Food processing
^{14}C-fumonisins in muffin processing, 1873
Food production
Safety assurance for *Salmonella* spp. in Swiss food production, 1139
Food safety
Arcobacter in retail meats, 1374
Detection of *E. coli* O157:H7 by gas sensors, 1455
Detection of *Salmonella*, 518
Disinfection of poultry transport containers, 793
E. coli cross-contamination, 1176
E. coli in growing spinach, 1790
E. coli O157 diversity and drying, 780
Inactivation of *S. cerevisiae* with RFEFs, 1712
Infectivity of *T. nativa* in country foods, 1857
Methods for quantitative microbial risk assessment, 1900
Models of antimicrobial resistance, 700
Prevalence of *Salmonella* in cull sows, 1134

Rapid detection of *L. monocytogenes* in food products, 1658
Recovery of *L. monocytogenes* from frankfurters, 584, 1920
Safety assurance for *Salmonella* spp.: a semiquantitative approach, 1146
Safety assurance for *Salmonella* spp. in Swiss food production, 1139
Food safety objective(s)
Applying the FSO concept to *L. monocytogenes* in lettuce, 256
Managing staphylococcal risk with FSOs, 1310
Food service
Produce wash effectiveness on food service lettuce, 2359
Food toxicology
AFM_1 in Mexican milk, 1885
Frankfurters
L. monocytogenes isolation from frankfurters, 2252
Recovery of *L. monocytogenes* from frankfurters, 584, 1920
Use of PFGE to monitor *L. monocytogenes*, 1465
Free chlorine
Bean and green sprout production, 1253
Freeze injury
Comparison of enrichment broths for recovery of freeze-injured *E. coli*, 1911
Effect of chilling methods on pork carcasses, 1019
Recovery methods of freeze-injured pathogens on pork, 798
Freezing
A novel method for the reduction of *L. monocytogenes*, 390
Reducing *Campylobacter* by freezing, 652
Fresh beef
L. monocytogenes on decontaminated fresh beef, 985
Fresh-cut vegetables
Evaluation of lactobacilli for control of pathogens on produce, 1013
Fresh produce
Produce rinse agents, 2210
Fruit
Mycotoxins in fruit products, 1514
Fruit juice analysis
Carbaryl and napthol detection in fruit juice, 1510
Fruit products
Mycotoxins in fruit products, 1514
Fully cooked chicken
Lethality of *Listeria* in chicken products, 578
Fumonisins
^{14}C-fumonisins in muffin processing, 1873
Extraction of fumonisin mycotoxins, 854
Functional properties
Heating of egg white powder and *Salmonella*, 825
Fungal growth
MAP for fungal prevention in cakes, 1864
Fungal transformation
Evaluating a reporter gene construct as a resistance-screening tool, 1927
Fungi
Proteolytic fungi on raw tomatoes, 911
Fusarium
Extraction of fumonisin mycotoxins, 854
Treating *Fusarium* in malting barley, 1241
Fusarium graminearum
ELISA for *Fusarium* species, 451
Fusarium moniliforme
ELISA for *Fusarium* species, 451
FB_1 production in maize germ and degermed kernels, 2116
Fusarium verticillioides
ELISA for *Fusarium* species, 451
Fuzzy math
Methods for quantitative microbial risk assessment, 1900

Gamma irradiation
Antimicrobial compounds in irradiated poultry, 2156
Gamma irradiation of pathogens in Kwamegi, 2093
Irradiation of oysters, 1025
Gas sensors
Detection of *E. coli* O157:H7 by gas sensors, 1455
Gastric juice
Protection of nutraceutical bacteria, 2076
GC-100X
Antimicrobial performance of alkaline ionic fluid (GC-100X), 1604
Gene cassette
Integrons in poultry carcasses, 1426
Genetically modified organism
Detectability of genetically modified feeds in milk, 304
Genotoxicity
Antigenotoxic effects of Korean soybean paste, 431
Genotoxicity of tremorgenic mycotoxins, 2123
Germination
Inactivation of *B. cereus* spores by HPP, 599
Irradiation control of *E. coli* O157:H7 and *Salmonella* on broccoli seeds, 760
Treating *Fusarium* in malting barley, 1241
Glial fibrillary acidic protein mRNA
Bovine CNS tissue in meat and meat products, 644
β-Glucuronidase
Evaluating a reporter gene construct as a resistance-screening tool, 1927
Gradient plates
Factors affecting growth of *Campylobacter*, 1190
Grapes
Ochratoxin A–producing fungi in grapes, 633
GRAS
Diacetyl-assisted depuration in oysters, 38
Green fluorescent protein
Predictive models for growth of *Salmonella*, 200
Greenhouse
Food safety program for greenhouse vegetables, 485
Ground beef
Comparison of enrichment broths for recovery of freeze-injured *E. coli*, 1911
E. coli cross-contamination, 1176
Effect of lactate on thermal inactivation of *E. coli* O157:H7, 664
Inhibition of *E. coli* O157:H7 in ground beef, 2038
pH enhancement of lean beef trimmings, 874
Thermal destruction of *E. coli* O157:H7 in ground beef, 1030
Growth
C. botulinum growth in vegetables, 833
Factors affecting growth of *Campylobacter*, 1190
Predictive models for growth of *Salmonella*, 200
Growth kinetics
Listeria growth under stress, 1208
Guidelines
Guidelines for investigating foodborne disease outbreaks, 2343

Ham
C. perfringens in cooling of cooked ham and beef, 1599
Hand contamination
Hand washing at a beef plant, 493
Hand washing
Hand washing at a beef plant, 493
Removal of microbes under fingernails, 2296
Harvesting method
Patulin levels in apple cider, 618
Hazard analysis critical control point
E. coli in growing spinach, 1790
HCT-8 cells
Acid and peroxide treatment of *C. parvum* oocysts, 1650
Heat inactivation
PEF and heat inactivation of stress-adapted *E. coli* O157:H7, 755
Predictive model for heat resistance of *L. monocytogenes* in beef, 804
Heat resistance
Bacillus heat resistance and hydrophobicity on stainless steel, 2070
Thermal inactivation model for starved *L. monocytogenes*, 1216
Heat shock
Behavior of *L. monocytogenes* after heat stress, 265
Heat shock protein
Stress responses of *E. coli* O157:H7 during starvation, 2045
Heat treatment

Survival after ozone treatment, 382
Helicobacter pylori
Antagonism of *H. pylori* by bacteriocins, 3
Effect of gastric acid on foodborne pathogens, 1292
Hens
Reduction of aflatoxin toxicity by Korean soybean paste, 866
Hepatitis A
Chemical inactivation of hepatitis A virus, 115
Hepatitis A virus
HAV persistence in oysters, 331
Hepatitis A virus detection in oysters, 507
RT-PCR for detection of HAV in shellfish, 1681
Herbs
Effect of spices and herbs on *Shigella*, 668
Screening herbs for fecal indicator viruses, 1506
Heterologous markers
Hake species identification, 2130
Heterophil
Functional effects of rP33 on heterophils, 787
Hg
Trace elements in Slovenian poultry tissues, 686
Hide(s)
Effect of chemical dehairing, 2005
STEC and *Salmonella* prevalence in beef processing, 1978
High hydrostatic pressure
Decontamination of seeds by HHP, 918
High hydrostatic pressure treatment of finfish, 1924
High hydrostatic pressure processing
Inactivation of *B. cereus* spores by HPP, 599
High-performance liquid chromatography
Bisphenol A migration from cans, 1444
Carbaryl and napthol detection in fruit juice, 1510
Determination of bisphenol A in milk and dairy products, 1439
High-pressure treatment of *T. macrosporus* ascospores, 1035
Outer membrane permeabilization by high pressure, 1360
Sublethal injury induced by preservation treatments, 31
High-pressure homogenization
Sublethal injury induced by preservation treatments, 31
High-pressure processing
Inactivation of *C. botulinum* by HPP, 1402
Vibrio response to high-pressure processing, 2276
Histamine
Amines in dried and salted tuna roe, 335
Histamine former
Detection of *M. morganii* by PCR, 1385
Homogenization
Salmonella Enteritidis detection, 1666
Honey
Significance of nonaromatic organic acids in honey, 2371
Honeydew
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Host resistance
Evaluating a reporter gene construct as a resistance-screening tool, 1927
Hot dog
Listeria monocytogenes in a brine chiller system, 1840
Hot water
Treating *Fusarium* in malting barley, 1241
Hot-water treatment
Pasteurization of RTE turkey products, 1618
Household
Preventing foodborne illness in the home, 2103
Hurdle technology
Gamma irradiation of pathogens in Kwamegi, 2093
Hydride generation–atomic absorption spectrometry
Arsenobetaine in manufactured baby foods, 2321
Hydrochloric acid
Effect of gastric acid on foodborne pathogens, 1292
Hydrogen peroxide
Comparison of fog and foam sanitization procedures, 592
Stress tolerance of *S. enterica* serovar Typhimurium DT104, 1115
UV-peroxide killing of spores, 1233
Hydrophobicity
Bacillus heat resistance and hydrophobicity on stainless steel, 2070
Hygiene
Chlorine in commercial broiler chicken drinking water, 2164
Hygiene practice
Microbiological quality of salad vegetables, 403
Hygiene training
Microbiological quality of open salad vegetables, 1581
Hyperplasia
Lactobacillus acidophilus attenuates hyperplasia, 457

Immunoassay
Detection of SEB in food, 1851
Immunocompromised
Virulence of *L. monocytogenes* in mice, 2362
Immunological detection
ELISA for *Fusarium* species, 451
Immunomagnetic separation
Antibody evaluation combined with flow cytometry detection, 1283
Biosensor for detection of *E. coli* O157:H7, 512
Cytometric assay for staphylococcal enterotoxin B, 1222
VTEC in food processing environments, 1576
Immunomodulation
Effect of diet on course of *Salmonella* infection in mice, 2160
Immunoperoxidase
Acid and peroxide treatment of *C. parvum* oocysts, 1650
Impedance
Electrical detection of *Campylobacter*, 1724
Inactivation
B. anthracis and contamination of food, 691
Chemical inactivation of hepatitis A virus, 115
High-pressure treatment of *T. macrosporus* ascospores, 1035
Inactivation of *B. cereus* spores by HPP, 599
Inactivation of *C. botulinum* by HPP, 1402
Salmonellae and citrus oils, 1704
Inactivation kinetics
PEF effect on orange-carrot juice, 2336
Inactivation model
PEF inactivation model for *E. coli*, 1007
Incubation
Salmonella Enteritidis in egg contents pools, 656
Indicators
Indicators of microbial quality of meat, 1733
Reduction of bacterial and viral pathogens on strawberries, 188
Infants
Extraction of fumonisin mycotoxins, 854
Inhibition
Inhibition of *C. perfringens*, 376
Inhibition of angiotensin converting enzyme
Inhibition of angiotensin converting enzyme by κ-casein macropeptide, 1686
Injured cells
Behavior of *L. monocytogenes* after heat stress, 265
Injury
L. monocytogenes isolation from frankfurters, 2252
Integrons
Integrons in poultry carcasses, 1426
Intention
A review of consumer food safety studies, 130
Internalin AB
PCR detection of *Listeria monocytogenes*, 237
Internal temperature
Thermal destruction of *E. coli* O157:H7 in ground beef, 1030
Intestinal cells
Stress tolerance of *S. enterica* serovar Typhimurium DT104, 1115
Intestinal epithelial cells
Modulation of epithelial cytokine production by lactic acid bacteria, 466
Inulin
Effects of Jerusalem artichokes on broiler chickens, 2171

Irradiation
Chemical and irradiation treatments for seeds, 767
Effect of ionizing radiation and diacetate on *L. monocytogenes*, 819
Effects of packaging and irradiation on nitrosamine formation, 1090
Irradiation and cryotolerance of *Salmonella*, 1916
Irradiation control of *E. coli* O157:H7 and *Salmonella* on broccoli seeds, 760
Irradiation of *L. monocytogenes* on endive, 993
Treating *Fusarium* in malting barley, 1241
Irradiation destruct value
Irradiation control of *E. coli* O157:H7 and *Salmonella* on broccoli seeds, 760
Irrigation
Persistence of *E. coli* O157:H7 on lettuce, 2198
Irrigation water
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Isoeugenol
A novel method for the reduction of *L. monocytogenes*, 390
Isolation
Isolation methods of *Salmonella* on farms, 1987
Italy
Ochratoxin A–producing fungi in grapes, 633

Juice concentrates
Inactivation of pathogens in juice concentrates, 1637
Survival of pathogens in juice concentrates, 1595

Keeping quality
Irradiation control of *E. coli* O157:H7 and *Salmonella* on broccoli seeds, 760
Kinetic modeling
Weibull-based inactivation model, 978
Kinetics-based model
Time-temperature integrators track poultry quality, 287
Knowledge
A review of consumer food safety studies, 130
Konjac fluid
Konjac fluid effects on bacteria, 1822
Korean soybean paste
Antigenotoxic effects of Korean soybean paste, 431
Reduction of aflatoxin toxicity by Korean soybean paste, 866

Lactate(s)
Effect of lactate on thermal inactivation of *E. coli* O157:H7, 664
Effects of potassium lactate and sodium diacetate on *Listeria*, 1469
Nisin and cations inhibit *L. monocytogenes*, 1631
Lactic acid bacteria
Adsorption and desorption of AFB_1 by bacteria, 426
Antagonism of *H. pylori* by bacteriocins, 3
Competitive exclusion product to reduce *E. coli* O157:H7, 355
E. coli O157:H7 prevalence in cattle fed direct-fed microbials, 748
Modulation of epithelial cytokine production by lactic acid bacteria, 466
Lactobacilli
Antagonism of pathogens in meat by lactobacilli, 418
Lactobacillus
Evaluation of lactobacilli for control of pathogens on produce, 1013
Lactobacillus acidophilus
Lactobacillus acidophilus attenuates hyperplasia, 457
Ultrasound and heat decontamination, 1642
Lactobacillus reuteri
Inhibition of *E. coli* O157:H7 in ground beef, 2038
Lairage
E. coli O157 diversity and drying, 780
Lairage conditions and pathogens' survival, 1570
Lamb carcasses
Listeria spp. on lamb carcasses, 328
Lamiaceae
Essential oils activity against food spoilage yeasts, 625
Lates calcarifer
Effect of essential oils on sea bass shelf life, 410
Lethal effect
Lethal effect of microwaves on *Bacillus* spp., 604
Lettuce
Applying the FSO concept to *L. monocytogenes* in lettuce, 256
Bacterial inoculation methods of fresh produce, 2010
E. coli cross-contamination, 1176
Microbiological quality of salad vegetables, 403
Persistence of *E. coli* O157:H7 on lettuce, 2198
Produce wash effectiveness on food service lettuce, 2359
Treatments for the natural microbiota of lettuce, 1697
Lipase
Antimicrobial activity of chitosan, 1495
Liquid chromatography
Arsenobetaine in manufactured baby foods, 2321
Liquid food
Ultrasound and heat decontamination, 1642
Liquid food matrices
Salmonella filaments at 8°C, 215
Liquid whole egg
Inhibition of *L. monocytogenes* in liquid whole egg, 999
Listeria
Applying the FSO concept to *L. monocytogenes* in lettuce, 256
Ecometric assessment of media, 1727
Enumeration of *Listeria* in poultry, 65
Fluorescent probes for viability assessment, 1393
Listeria monocytogenes in a brine chiller system, 1840
pH enhancement of lean beef trimmings, 874
Predicting thermal lethality, 242
Real-time PCR assay for *Salmonella* and *Listeria*, 2141
Survey of sprouts and mushrooms, 182
Listeria monocytogenes
A novel method for the reduction of *L. monocytogenes*, 390
Antibacterial phenolic compounds, 1811
Antibody evaluation combined with flow cytometry detection, 1283
Automated ribotyping and PFGE typing of *L. monocytogenes*, 249
Behavior of *L. monocytogenes* after heat stress, 265
Comparison of fog and foam sanitization procedures, 592
Cross-contamination of orange juice, 1490
Effectiveness of TSP on chicken skin, 61
Effect of chilling methods on pork carcasses, 1019
Effect of ionizing radiation and diacetate on *L. monocytogenes*, 819
Evaluation of a chromogenic agar for detection of *L. monocytogenes*, 441
Inactivation, growth, and survival of *L. monocytogenes*, 1611
Inactivation of bacteria on tomatoes by electrolyzed acidic water, 542
Inactivation of pathogens in juice concentrates, 1637
Inhibition of *L. monocytogenes* in liquid whole egg, 999
Inhibition of *L. monocytogenes* in smoked salmon, 1420
Lethality of *Listeria* in chicken products, 578
Listeria growth under stress, 1208
Listeria spp. on lamb carcasses, 328
L. monocytogenes and *E. coli* O157:H7 in minimally processed artichokes, 2203
L. monocytogenes in RTE foods, 559
L. monocytogenes isolation from frankfurters, 2252
L. monocytogenes: low levels equal low risk, 570
L. monocytogenes on decontaminated fresh beef, 985
L. monocytogenes on RTE meats inoculated with a dustlike vector, 962
L. monocytogenes with different barotolerances, 2057
Nisin and cations inhibit *L. monocytogenes*, 1631
Ozonation of alfalfa seeds and sprouts, 44
Pasteurization of RTE turkey products, 1618
PCR detection of *Listeria monocytogenes*, 237
Persistent and nonpersistent *L. monocytogenes* contamination, 2062
Predictive model for heat resistance of *L. monocytogenes* in beef, 804
Prevalence and types of *L. monocytogenes*, 1413
Probelia PCR for *L. monocytogenes*, 436
Quality of retail roe, 1832
Radiant heat pasteurization of RTE meats, 1623
Radiation and SDA-PL mixtures for elimination of *L. monocytogenes*, 2051

Rapid detection of *L. monocytogenes* in food products, 1658
Recovery methods of freeze-injured pathogens on pork, 798
Recovery of *L. monocytogenes* from frankfurters, 584, 1920
Reducing *L. monocytogenes* on salmon, 812
Sources of *L. monocytogenes* in smoked fish, 52
Stability and efficacy of EO water against pathogens, 1379
Survival after ozone treatment, 382
Survival of pathogens in juice concentrates, 1595
Thermal inactivation model for starved *L. monocytogenes,* 1216
Use of PFGE to monitor *L. monocytogenes,* 1465
Viability of pathogens in yellow fat products, 549
Virulence of *L. monocytogenes* in mice, 2362
Listeria monocytogenes Scott A
Effects of potassium lactate and sodium diacetate on *Listeria,* 1469
Listeria spp.
Listeria spp. on lamb carcasses, 328
Rapid detection of *L. monocytogenes* in food products, 1658
Liver
Aflatoxin decontamination with clinoptilolite in feed for laying hens, 860
Low temperature
Stress responses of *E. coli* O157:H7 during starvation, 2045
Lysozyme
E. coli O157:H7 inhibition by lysozyme and chelators, 1783

Macrophage
Stress tolerance of *S. enterica* serovar Typhimurium DT104, 1115
Maize
Aspergillus ear rot and aflatoxin in corn hybrids, 637
Evaluating a reporter gene construct as a resistance-screening tool, 1927
Male-specific coliphages
Fecal contaminants on carrots, 88
Screening herbs for fecal indicator viruses, 1506
Malting barley
Treating *Fusarium* in malting barley, 1241
Manure
E. coli O157:H7 in compost, 25, 1771
Margarine
Viability of pathogens in yellow fat products, 549
Marinade
Phosphate dip for poultry, 1701
Marination
Survival of *Salmonella* on beef jerky during storage, 396
Marine mammal
Infectivity of *T. nativa* in country foods, 1857
Marine snail
TTX-associated snail poisoning, 110
Mastitis
S. aureus enterotoxin from mastitic cows, 1693
MCPI
Potato and tomato PCR identification, 1063
Meat
Antagonism of pathogens in meat by lactobacilli, 418
Bovine CNS tissue in meat and meat products, 644
COP and lipid oxidation in raw and cooked chicken breast, 840
E. coli O157 diversity and drying, 780
Recovery of *L. monocytogenes* from frankfurters, 584, 1920
VTEC in food processing environments, 1576
Meat and bone meal
mtDNA detection in MBM, 103
PCR assay for detection of animal tissue in feeds, 2307
Meat decontamination
Sanitizer treatment of acid-stressed *E. coli* O157:H7 biofilms, 2258
Meat product(s)
Bovine CNS tissue in meat and meat products, 644
Inhibition of *C. perfringens,* 376
Mechanically separated poultry
Petrifilm Staph Express Count method for *S. aureus* enumeration, 2151
Mechanism
Fluoroquinolone resistance mechanism in *C. jejuni,* 319
Media
Ecometric assessment of media, 1727
Mediterranean Sea
Mercury speciation in edible fish, 300
Meloidogne incognita
M. incognita infection does not assist *Salmonella,* 1459
Melon
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Mercury
Mercury speciation in edible fish, 300
Merluccius
Hake species identification, 2130
Metallo-carboxypeptidase inhibitor
Potato and tomato PCR identification, 1063
Methanol extract
Antigenotoxic effects of Korean soybean paste, 431
Method development
Simultaneous detection of prohibited materials in complete feed by PCR, 1085
Methods
Isolation methods of *Salmonella* on farms, 1987
Methyl-mercury
Mercury speciation in edible fish, 300
MIC
Antimicrobial properties of annatto, 1074
Mice
Effect of diet on course of *Salmonella* infection in mice, 2160
Microbial ingress
Loss of hermetic seal as affected by microorganism characteristics, 1716
Microbial inhibition test
Accuracy of BRT and Delvotest, 473
Microbial interaction
Microbial interaction and death of *E. coli* in fermenting olives, 1166
Microbial quality
Indicators of microbial quality of meat, 1733
Microbial safety
Gamma irradiation of pathogens in Kwamegi, 2093
Microbiological quality
Microbiological quality of open salad vegetables, 1581
Microbiological quality of salad vegetables, 403
Quality of retail roe, 1832
Vacuum skin packaging of retail cuts of beef, 2085
Microsatellites
Hake species identification, 2130
Microstaphylococci
Antibiotic resistance in *Micrococcaceae,* 937
Microwave
Lethal effect of microwaves on *Bacillus* spp., 604
Migration
Bisphenol A migration from cans, 1444
Mild heat
Sublethal injury induced by preservation treatments, 31
Milk
AFM_1 in Mexican milk, 1885
Detectability of genetically modified feeds in milk, 304
Detection and fate of *B. anthracis* (Sterne) spores in raw milk, 2349
Detection of *Salmonella* spp. in raw milk, 1762
Enterococci in milk, beef, and chicken, 931
Milk and dairy products
Determination of bisphenol A in milk and dairy products, 1439
Mineral water
Enteroaggregative *E. coli* in bottled water, 497
Minimally processed vegetables
L. monocytogenes and *E. coli* O157:H7 in minimally processed artichokes, 2203
Mixed orange and carrot juice
PEF inactivation model for *E. coli,* 1007
Modeling
Effect of ethanol on *C. botulinum,* 610

Microbial interaction and death of *E. coli* in fermenting olives, 1166
Models of antimicrobial resistance, 700
Model validation
Growth of *A. acidoterrestris* spores, 2216
Modified atmosphere packaging
Effects of packaging and irradiation on nitrosamine formation, 1090
MAP for fungal prevention in cakes, 1864
Moisture enhanced
Storage life, safety, moisture-enhanced pork, 293
Mold
Proteolytic fungi on raw tomatoes, 911
Mold decontamination
Ozone disinfection, 2355
Molecular weight
Antimicrobial activity of chitosan, 1495
Monoclonal antibody
Grouper identification by ELISA, 886
Monte Carlo simulation
Methods for quantitative microbial risk assessment, 1900
Morganella morganii
Detection of *M. morganii* by PCR, 1385
Morphology
Listeria growth under stress, 1208
Most probable number
Enumeration of *Listeria* in poultry, 65
Rapid MPN-based ELISA, 2302
Mouse
Virulence of *L. monocytogenes* in mice, 2362
mtDNA
mtDNA detection in MBM, 103
Mucosal Starter Culture
CE products control the colonization of *Salmonella* in broilers, 490
Multiplex
Real-time PCR assay for *Salmonella* and *Listeria,* 2141
Mung bean seeds
Chemical and irradiation treatments for seeds, 767
Mushrooms
Survey of sprouts and mushrooms, 182
Mutagenicity
Mutagenicity of fumes from fried chicken legs, 1269
Mycotoxin(s)
AFM_1 in Mexican milk, 1885
Aspergillus ear rot and aflatoxin in corn hybrids, 637
Extraction of fumonisin mycotoxins, 854
FB_1 production in maize germ and degermed kernels, 2116

NaCl
C. perfringens in cooling of cooked ham and beef, 1599
Listeria growth under stress, 1208
Nailbrushes
Removal of microbes under fingernails, 2296
1-Naphthol
Carbaryl and napthol detection in fruit juice, 1510
Natamycin
Investigating natamycin derivative's ability to prevent cheese molding, 1499
Natural antimicrobial compounds
Antimicrobial compounds in irradiated poultry, 2156
Natural fermentation
Fermentation of cowpea flours, 2313
Nematode(s)
Absence of nematodes in farmed Atlantic salmon in Norway, 122
Attraction of *C. elegans* to foodborne pathogens, 1964
Interactions of *C. elegans* with soil microfauna, 1543
New genera
Renamed foodborne taxa, 1304
Nisin
Inhibition of *L. monocytogenes* in liquid whole egg, 999
Inhibition of nonproteolytic *C. botulinum* with LAB, 674
Nisin and cations inhibit *L. monocytogenes,* 1631
Nitrate adaptation
Salmonella reduction by nitrate and chlorate, 660
Nitrite
L. monocytogenes isolation from frankfurters, 2252
Nitrosamine
Effects of packaging and irradiation on nitrosamine formation, 1090
Nonaromatic organic acids
Significance of nonaromatic organic acids in honey, 2371
Nonthermal pasteurization
Inactivation of *S. cerevisiae* with RFEFs, 1712
Nonvolatile amines
Amines in dried and salted tuna roe, 335

Ochratoxin A
A. carbonarius as source of ochratoxin A in dried vine fruits, 504
Mycotoxins in fruit products, 1514
Ochratoxin A–producing fungi in grapes, 633
1-octen-3-ol
Antifungal activity of ODA and 1-octen-3-ol against *P. expansum,* 1503
1-2 Test
Detection of *Salmonella,* 518
On-farm food safety
Food safety program for greenhouse vegetables, 485
Ontario
Enteric illness in Ontario, Canada, 953
Oocyst
Acid and peroxide treatment of *C. parvum* oocysts, 1650
Open food
Microbiological quality of open salad vegetables, 1581
Orange-carrot juice
PEF effect on orange-carrot juice, 2336
Orange juice
Cross-contamination of orange juice, 1490
Enantiomeric excesses of terpenes in juices, 1448
Irradiation and cryotolerance of *Salmonella,* 1916
Oregano
Effect of essential oils on sea bass shelf life, 410
Organic acids
Control of *C. perfringens* with organic acids, 1408
Organochlorine pesticides
Chemical contaminants in smoked seafood, 1095
Ostrich carcasses
Microbial quality of ostrich carcasses, 878
Outbreak
Guidelines for investigating foodborne disease outbreaks, 2343
Parsley-associated *Shigella* and *E. coli* outbreaks, 535
Salmonella outbreak associated with alfalfa sprouts, 13
Virulence aspects of *E. sakazakii,* 370
Outer-membrane permeabilization
Outer membrane permeabilization by high pressure, 1360
10-oxo-*trans*-8-decenoic acid
Antifungal activity of ODA and 1-octen-3-ol against *P. expansum,* 1503
Oyster(s)
Diacetyl-assisted depuration in oysters, 38
Hepatitis A virus detection in oysters, 507
Irradiation of oysters, 1025
Passage of coccidial parasites through oysters, 679
Vibrio response to high-pressure processing, 2276
Ozone
Ozone disinfection, 2355
Ozone treatment
Ozone treatment for beef carcass surfaces, 775
Survival after ozone treatment, 382

P33
Functional effects of rP33 on heterophils, 787
Package sterility
Loss of hermetic seal as affected by microorganism characteristics, 1716
Packing practices
Bacterial contamination of cantaloupe and honeydew melon rinds, 82

Pantoea agglomerans
Cantaloupe sanitization, 1805
Paralytic toxin
TTX-associated snail poisoning, 110
Parsley
Screening herbs for fecal indicator viruses, 1506
Pasteurization
Lethality of *Listeria* in chicken products, 578
Thermal inactivation of *E. coli* in camel milk, 1708
Pathogen
Detection and fate of *B. anthracis* (Sterne) spores in raw milk, 2349
Detection of *Salmonella* spp. in raw milk, 1762
Evaluation of lactobacilli for control of pathogens on produce, 1013
Prevalence of *Campylobacter* in swine, 1550
Recovery of *L. monocytogenes* from frankfurters, 584,1920
Pathogenicity
Virulence of *L. monocytogenes* in mice, 2362
Pathogen inactivation
Reduction of bacterial and viral pathogens on strawberries, 188
Pathogen survival
Lairage conditions and pathogens' survival, 1570
Pathogen thermal kill
Predicting thermal lethality, 242
Patulin
Mycotoxins in fruit products, 1514
Patulin levels in apple cider, 618
Pb
Trace elements in Slovenian poultry tissues, 686
PCI
Potato and tomato PCR identification, 1063
PCR
Automated BAX *Salmonella* detection, 2138
Detectability of genetically modified feeds in milk, 304
Detection and fate of *B. anthracis* (Sterne) spores in raw milk, 2349
Detection of *M. morganii* by PCR, 1385
Detection of *Salmonella* spp. in raw milk, 1762
Detection of viable Shiga toxin–producing *E. coli*, 1277
Discriminant PCR for detection of terrestrial animals in fish meal, 682
Improved PCR for *tdh* detection, 1675
Multiplex PCRs for detection of enterotoxigenic *S. aureus*, 1055
PCR assay for detection of animal tissue in feeds, 2307
PCR detection of *Listeria monocytogenes*, 237
PCR-ELISA for *Salmonella* detection, 2367
PCR for detection of *Enterobacteriaceae*, 1798
Rapid detection of *L. monocytogenes* in food products, 1658
Rapid separation and concentration of bacteria in food, 1935
Real-time PCR assay for *Salmonella* and *Listeria*, 2141
Simultaneous detection of prohibited materials in complete feed by PCR, 1085
VTEC in food processing environments, 1576
Peanut
Aflatoxin reduction, 1879
Undeclared peanut protein in imported chocolates, 1932
Pectin methyl esterase
PEF effect on orange-carrot juice, 2336
Pediocin A
Inhibition of nonproteolytic *C. botulinum* with LAB, 674
Pediococcus
Ecometric assessment of media, 1727
Penicillium expansum
Antifungal activity of ODA and 1-octen-3-ol against *P. expansum*, 1503
Penicillium spp.
Ochratoxin A–producing fungi in grapes, 633
Peptic ulcer disease
Effect of gastric acid on foodborne pathogens, 1292
Peracetic acid
Comparison of fog and foam sanitization procedures, 592
Treatments for the natural microbiota of lettuce, 1697
Percent transfer
Pathogen transfer from stainless steel surfaces, 2231
Peroxyacetic acid
Comparison of fog and foam sanitization procedures, 592
Persistence
Survival of *Campylobacter* and *Salmonella* on surfaces, 1587
Persistent contamination
Persistent and nonpersistent *L. monocytogenes* contamination, 2062
pH
Effects of potassium lactate and sodium diacetate on *Listeria*, 1469
FB_1 production in maize germ and degermed kernels, 2116
Inactivation of *B. cereus* spores by HPP, 599
Weibull-based inactivation model, 978
Phage types
Salmonella Enteritidis phage types in Brazil, 324
Phage typing
Porcine *Campylobacter* phenotyping, 1079
Phenolic benzaldehydes
Antibacterial phenolic compounds, 1811
Phenolic benzoic acids
Antibacterial phenolic compounds, 1811
Phenotyping
Porcine *Campylobacter* phenotyping, 1079
Phosphates
Phosphate dip for poultry, 1701
Phosphatidylinositol-specific phospholipase C
Evaluation of a chromogenic agar for detection of *L. monocytogenes*, 441
Physicochemical quality
Vacuum skin packaging of retail cuts of beef, 2085
Physiological status
E. coli O157:H7 survival in dry sausages, 2267
Plant extracts
Antimicrobial properties of annatto, 1074
Plasmids
Isolation of vancomycin-resistant *E. faecalis* from beef, 1845
Plate-based methodology
Campylobacter in ready-to-eat foods, 2135
Polychlorinated biphenyls
Chemical contaminants in smoked seafood, 1095
PCB intake from fish: evaluation of the dietary risk, 2176
PCBs in foods from Catalonia, Spain, 479
Polycyclic aromatic hydrocarbons
Chemical contaminants in smoked seafood, 1095
PAHs in foods, 2325
Polyene macrolide
Investigating natamycin derivative's ability to prevent cheese molding, 1499
Polysorbate 80
A novel method for the reduction of *L. monocytogenes*, 390
Pork
C. perfringens outgrowth in beef and pork during chilling, 501
Effect of chilling methods on pork carcasses, 1019
Recovery methods of freeze-injured pathogens on pork, 798
Storage life, safety, moisture-enhanced pork, 293
Postcook in-package pasteurization
Pasteurization of RTE turkey products, 1618
Postharvest processing
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Postprocess pasteurization
Predicting thermal lethality, 242
Potassium lactate
Radiation and SDA-PL mixtures for elimination of *L. monocytogenes*, 2051
Potato
Potato and tomato PCR identification, 1063
Potato dextrose agar
Antifungal activity of ODA and 1-octen-3-ol against *P. expansum*, 1503
Poultry
Antibiotic resistance of bacteria from poultry products, 94
Antimicrobial compounds in irradiated poultry, 2156
Campylobacter levels in 1995 and 2001 broiler operations, 1557

Characterization of *Arcobacter* isolates, 364
Effectiveness of TSP on chicken skin, 61
Enterococci in milk, beef, and chicken, 931
Enumeration of *Listeria* in poultry, 65
Microbiological baseline for air-chilling poultry operations, 272
Phosphate dip for poultry, 1701
Reducing *Campylobacter* by freezing, 652
Salmonella reduction by nitrate and chlorate, 660
Poultry processing
Integrons in poultry carcasses, 1426
Poultry products
Bacteriophage-mediated control of *Salmonella* in poultry frankfurters, 220
Poultry quality
Modeling quality loss in poultry, 280
Time-temperature integrators track poultry quality, 287
Poultry scald water
Rapid MPN-based ELISA, 2302
Poultry tissue
Trace elements in Slovenian poultry tissues, 686
Predictive model
MAP for fungal prevention in cakes, 1864
Predictive model for heat resistance of *L. monocytogenes* in beef, 804
Predictive models for growth of *Salmonella,* 200
Thermal inactivation model for starved *L. monocytogenes,* 1216
Preenrichment
Detection of Enteritidis in eggs, 1670
Preharvest
Salmonella in pigs and pork, 1126
Preharvest food safety
E. coli O157:H7 prevalence in cattle fed direct-fed microbials, 748
Pressure death response
L. monocytogenes with different barotolerances, 2057
Prevalence
E. coli O157:H7 in southeastern beef cows, 1778
L. monocytogenes in RTE foods, 559
Prevalence and antibiotic susceptibility of *Salmonella,* 1154
Prevention
Preventing foodborne illness in the home, 2103
Probability
Effect of ethanol on *C. botulinum,* 610
Probelia PCR
Probelia PCR for *L. monocytogenes,* 436
Probiotic(s)
Competitive exclusion product to reduce *E. coli* O157:H7, 355
Modulation of epithelial cytokine production by lactic acid bacteria, 466
Probiotic agents
Inhibition of nonproteolytic *C. botulinum* with LAB, 674
Probiotic bacteria
EHEC in weaned calves, 1184
Enterohemorrhagic *E. coli* in neonatal calves, 924
Processing
Shell egg processing plant sanitation, 1486
Processing environment
Sources of *L. monocytogenes* in smoked fish, 52
Processing machine
Persistent and nonpersistent *L. monocytogenes* contamination, 2062
Process lethality
Predicting thermal liability, 242
Process parameters
E. coli O157:H7 survival in dry sausages, 2267
Produce
E. coli O157:H7 in produce, 18
Reduction of bacterial and viral pathogens on strawberries, 188
Produce wash
Antimicrobial performance of alkaline ionic fluid (GC-100X), 1604
Produce wash effectiveness on food service lettuce, 2359
Production
Quantitative assay for *B. cereus* emetic toxin in bakery products, 1047
Productivity
Ecometric assessment of media, 1727
Prophylactic
Lactobacillus acidophilus attenuates hyperplasia, 457
Protective cultures
Inhibition of nonproteolytic *C. botulinum* with LAB, 674
Proteolytic
Proteolytic fungi on raw tomatoes, 911
Proteolytic *Clostridium botulinum*
C. botulinum growth in vegetables, 833
Pseudomonas spp.
Microbial quality of ostrich carcasses, 878
Pulsed electric field(s)
PEF and heat inactivation of stress-adapted *E. coli* O157:H7, 755
PEF effect on orange-carrot juice, 2336
PEF inactivation model for *E. coli,* 1007
Sublethal injury induced by preservation treatments, 31
Pulsed-field gel electrophoresis
Automated ribotyping and PFGE typing of *L. monocytogenes,* 249
Fecal contaminants on carrots, 88
Prevalence and types of *L. monocytogenes,* 1413
Use of PFGE to monitor *L. monocytogenes,* 1465
Pulsed white light
Sublethal injury induced by preservation treatments, 31

Quadratic response surface methodology
Growth of *A. acidoterrestris* spores, 2216
Quality assurance
Comparison of a modified digestion assay with trichinoscopy, 1043
Quantification
Potato and tomato PCR identification, 1063
Quantitative assay
Quantitative assay for *B. cereus* emetic toxin in bakery products, 1047
Quantitative PCR
Detection of viable Shiga toxin–producing *E. coli,* 1277

Radiant heat pasteurization
Radiant heat pasteurization of RTE meats, 1623
Radiation
Radiation and SDA-PL mixtures for elimination of *L. monocytogenes,* 2051
Radio frequency energy
Inactivation of *S. cerevisiae* with RFEFs, 1712
Radish seeds
Chemical and irradiation treatments for seeds, 767
Random amplified polymorphic DNA
Isolation of vancomycin-resistant *E. faecalis* from beef, 1845
Random vibration test
A model to predict loss of hermetic seal in liquid food packages, 1260
Rapid automated bacterial impedance
Electrical detection of *Campylobacter,* 1724
Rapid detection
Cytometric assay for staphylococcal enterotoxin B, 1222
Rapid bioluminescent method for *Salmonella,* 1996
Salmonella Enteritidis in egg contents pools, 656
Rapid method
Rapid coliforms detection method, 2146
Rapid separation
Rapid separation and concentration of bacteria in food, 1935
Raw chicken skin
Viability of *Campylobacter* on chicken and pork skins, 2023
Raw material
Counting and detection of aflatoxin-producing molds, 311
Raw milk
Petrifilm Staph Express Count method for *S. aureus* enumeration, 2151
Raw pork skin
Viability of *Campylobacter* on chicken and pork skins, 2023
Ready-to-eat foods
Campylobacter in ready-to-eat foods, 2135
L. monocytogenes in RTE foods, 559
Pathogen transfer from stainless steel surfaces, 2231
Ready-to-eat meat

L. monocytogenes on RTE meats inoculated with a dustlike vector, 962
PCR detection of *Listeria monocytogenes*, 237
Radiant heat pasteurization of RTE meats, 1623
Ready-to-eat poultry
Pasteurization of RTE turkey products, 1618
Real-time PCR
Potato and tomato PCR identification, 1063
Real-time PCR assay for *Campylobacter*, 1343
Real-time PCR assay for *Salmonella* and *Listeria*, 2141
Recontamination
Modeling biofilm formation, 1432
Recovery
B. anthracis and contamination of food, 691
Recovery of *L. monocytogenes* from frankfurters, 584, 1920
Recovery methodology
Whole-carcass enrichment, 1768
Refrigeration
C. perfringens in cooked meat and poultry, 1227
Inhibition of nonproteolytic *C. botulinum* with LAB, 674
Relaying
HAV persistence in oysters, 331
Repair
Behavior of *L. monocytogenes* after heat stress, 265
Resistance
Fluoroquinolone resistance mechanism in *C. jejuni*, 319
Restriction fragment length polymorphism
Bovine CNS tissue in meat and meat products, 644
Restructured roast beef
Control of *C. perfringens* with organic acids, 1408
Retail meats
Arcobacter in retail meats, 1374
Retail survey
Recovery of *L. monocytogenes* from frankfurters, 584
Retail traceability
Vacuum skin packaging of retail cuts of beef, 2085
Reverse transcriptase–PCR
Bovine CNS tissue in meat and meat products, 644
Hepatitis A virus detection in oysters, 507
RT-PCR for detection of HAV in shellfish, 1681
Review
Significance of nonaromatic organic acids in honey, 2371
Review of bacterial taxa
Renamed foodborne taxa, 1304
rfb gene cluster
PCR-ELISA for *Salmonella* detection, 2367
Ribotype
Sources of *L. monocytogenes* in smoked fish, 52
Ribotyping
Automated ribotyping and PFGE typing of *L. monocytogenes*, 249
Rinse
Recovery of *L. monocytogenes* from frankfurters, 584, 1920
Weep and carcass rinse comparison for *Campylobacter* recovery, 1720
Ripening room
Ozone disinfection, 2355
Risk
Pathogen transfer from stainless steel surfaces, 2231
Risk assessment
Inactivation, growth, and survival of *L. monocytogenes*, 1611
L. monocytogenes: low levels equal low risk, 570
Managing staphylococcal risk with FSOs, 1310
Methods for quantitative microbial risk assessment, 1900
Models of antimicrobial resistance, 700
Risk communication
Consumer behaviors associated with foodborne illnesses, 1893
Risk management
Food safety program for greenhouse vegetables, 485
L. monocytogenes: low levels equal low risk, 570
River lamprey
Microbes in river lampreys, 2332
Roe
Quality of retail roe, 1832

Safety
Quality of retail roe, 1832
Safety assurance
Safety assurance for *Salmonella* spp. in Swiss food production, 1139
Salad vegetables
E. coli in growing spinach, 1790
Microbiological quality of open salad vegetables, 1581
Microbiological quality of salad vegetables, 403
SAL assay
Screening herbs for fecal indicator viruses, 1506
Salmon
Probelia PCR for *L. monocytogenes*, 436
Reducing *L. monocytogenes* on salmon, 812
Sources of *L. monocytogenes* in smoked fish, 52
Salmonella
Acid tolerance among antimicrobial-susceptible and -resistant *Salmonella*, 732
Antagonism of pathogens in meat by lactobacilli, 418
Antimicrobial compounds in irradiated poultry, 2156
Attachment of *Salmonella* on tomatoes and tomatillos, 1756
Attraction of *C. elegans* to foodborne pathogens, 1964
Automated BAX *Salmonella* detection, 2138
Bacterial inoculation methods of fresh produce, 2010
Bacteriophage-mediated control of *Salmonella* in poultry frankfurters, 220
CE products control the colonization of *Salmonella* in broilers, 490
Competitive exclusion of *Salmonella*, 1353
Cross-contamination of orange juice, 1490
Detection of *Salmonella*, 518
Detection of *Salmonella* spp. in raw milk, 1762
E. coli O157:H7 and *Salmonella* on alfalfa seed, 1158
Ecometric assessment of media, 1727
Effect of diet on course of *Salmonella* infection in mice, 2160
EO water for inactivation of *Salmonella* on alfalfa sprouts, 208
Heating of egg white powder and *Salmonella*, 825
Inactivation of pathogens in juice concentrates, 1637
Inactivation of *Salmonella* in dried apples, 2245
Inactivation of *Salmonella* on alfalfa seeds, 2017
Irradiation and cryotolerance of *Salmonella*, 1916
Irradiation control of *E. coli* O157:H7 and *Salmonella* on alfalfa seed, 175
Irradiation control of *E. coli* O157:H7 and *Salmonella* on broccoli seeds, 760
Irradiation of oysters, 1025
Isolation methods of *Salmonella* on farms, 1987
Lairage conditions and pathogens' survival, 1570
Microbiological baseline for air-chilling poultry operations, 272
M. incognita infection does not assist *Salmonella*, 1459
PCR-ELISA for *Salmonella* detection, 2367
pH enhancement of lean beef trimmings, 874
Predicting thermal lethality, 242
Predictive models for growth of *Salmonella*, 200
Prevalence and antibiotic susceptibility of *Salmonella*, 1154
Prevalence of *Salmonella* in cull sows, 1134
Produce rinse agents, 2210
Rapid bioluminescent method for *Salmonella*, 1996
Real-time PCR assay for *Salmonella* and *Listeria*, 2141
Reducing *Salmonella* on apples, 741
Response of bacterial pathogens to ultraviolet energy, 1071
Safety assurance for *Salmonella* spp.: a semiquantitative approach, 1146
Safety assurance for *Salmonella* spp. in Swiss food production, 1139
Salmonella detection by fish, 723
Salmonellae and citrus oils, 1704
Salmonella filaments at 8°C, 215
Salmonella in pigs and pork, 1126
Salmonella outbreak associated with alfalfa sprouts, 13
Salmonella reduction by nitrate and chlorate, 660
Salmonella serovars in live shellfish, 226

Survey of sprouts and mushrooms, 182
Survival of *Campylobacter* and *Salmonella* on surfaces, 1587
Survival of pathogens in detergents, 1462
Survival of pathogens in juice concentrates, 1595
Survival of *Salmonella* in waste egg wash water, 233
Survival of *Salmonella* on beef jerky during storage, 396
Viability of pathogens in yellow fat products, 549
Whole carcass enrichment, 446, 1768
Salmonella enterica
Antibacterial phenolic compounds, 1811
Cantaloupe sanitization, 1805
Salmonella enterica serovar Enteritidis
Salmonella Enteritidis in egg contents pools, 656
Salmonella enterica serovar Typhimurium
Pathogen transfer from stainless steel surfaces, 2231
Salmonella Enteritidis
Inactivation of bacteria on tomatoes by electrolyzed acidic water, 542
Salmonella Enteritidis detection, 1666
Salmonella Enteritidis phage types in Brazil, 324
S. aureus and *Salmonella* Enteritidis survival on salted sardines, 1479
Tolerance of pathogens to cleaning treatments, 2289
Salmonella Enteritidis immune lymphokine
Functional effects of rP33 on heterophils, 787
Salmonella Enteritidis recovery
Detection of Enteritidis in eggs, 1670
Salmonella growth in egg
Salmonella Enteritidis growth on the vitelline membrane, 1368
Salmonella incidence
Whole-carcass enrichment, 1768
Salmonella Typhimurium
Effect of chilling methods on pork carcasses, 1019
Effect of gastric acid on foodborne pathogens, 1292
Ozone treatment for beef carcass surfaces, 775
Rapid MPN-based ELISA, 2302
Recovery methods of freeze-injured pathogens on pork, 798
Stability and efficacy of EO water against pathogens, 1379
Sublethal injury induced by preservation treatments, 31
Salmonellosis
Microbiological quality of salad vegetables, 403
Models of antimicrobial resistance, 700
Salt
Listeria monocytogenes in a brine chiller system, 1840
Salted sardines
S. aureus and *Salmonella* Enteritidis survival on salted sardines, 1479
Sample type influences
Effectiveness of TSP on chicken skin, 61
Sanitary control
Hepatitis A virus detection in oysters, 507
Sanitation
Cantaloupe sanitization, 1805
Shell egg processing plant sanitation, 1486
Sanitizers
Sanitizer treatment of acid-stressed *E. coli* O157:H7 biofilms, 2258
Sausages
Antibiotic resistance in *Micrococcaceae*, 937
Scallop shell
Sporicidal action of heated shell powder, 1482
Screening methods
Antibiotic residue persistence in ewe's milk, 2097
Seafood
Improved PCR for *tdh* detection, 1675
Seafood safety
Reducing *L. monocytogenes* on salmon, 812
Seal
Infectivity of *T. nativa* in country foods, 1857
Seawater
A-1 medium minus salicin, 120
Seeds
Irradiation control of *E. coli* O157:H7 and *Salmonella* on broccoli seeds, 760
Seed sprouts
Decontamination of seeds by HHP, 918
Selective agars
Detection of Enteritidis in eggs, 1670
Selective media
Campylobacter detection, 1752
L. monocytogenes isolation from frankfurters, 2252
Semiquantitative analysis
mtDNA detection in MBM, 103
Semiquantitative risk assessment
Safety assurance for *Salmonella* spp.: a semiquantitative approach, 1146
Sensory quality
Quality of retail roe, 1832
Serotype
Prevalence and types of *L. monocytogenes*, 1413
Serotyping
Porcine *Campylobacter* phenotyping, 1079
Sheep
Chlorate reduces *E. coli* O157:H7 populations in sheep, 194
Microbiological monitoring of sheep carcass contamination, 946
Shelf life
Ultrasound and heat decontamination, 1642
Vacuum skin packaging of retail cuts of beef, 2085
Shell eggs
Shell egg processing plant sanitation, 1486
Shellfish
HAV persistence in oysters, 331
RT-PCR for detection of HAV in shellfish, 1681
Salmonella serovars in live shellfish, 226
Shiga
E. coli O157 diversity and drying, 780
Shiga toxin–producing *Escherichia coli*
Detection of viable Shiga toxin–producing *E. coli*, 1277
Microbiological monitoring of sheep carcass contamination, 946
Shigella
Effect of spices and herbs on *Shigella*, 668
Produce rinse agents, 2210
Survival of pathogens in detergents, 1462
Shigella sonnei
Parsley-associated *Shigella* and *E. coli* outbreaks, 535
Shrimp
Aflatoxin contamination in shrimp feed, 882
16S rDNA
Detection of *M. morganii* by PCR, 1385
Rapid detection of *L. monocytogenes* in food products, 1658
Slaughter
Prevalence of *Campylobacter* in swine, 1550
Slaughterhouse
Characterization of *Arcobacter* isolates, 364
E. coli O157 contamination routes in a cattle slaughterhouse, 1564
E. coli O157 diversity and drying, 780
Slaughter hygiene monitoring
Microbiological monitoring of sheep carcass contamination, 946
Smoke
Mutagenicity of fumes from fried chicken legs, 1269
Smoked fish
Petrifilm Staph Express Count method for *S. aureus* enumeration, 2151
Sources of *L. monocytogenes* in smoked fish, 52
Smoked salmon
Inhibition of *L. monocytogenes* in smoked salmon, 1420
Smoked seafood
Chemical contaminants in smoked seafood, 1095
Sodium chloride
Stress tolerance of *S. enterica* serovar Typhimurium DT104, 1115
Sodium diacetate
Control of clostridia in turkey, 1474
Effect of ionizing radiation and diacetate on *L. monocytogenes*, 819
Radiation and SDA-PL mixtures for elimination of *L. monocytogenes*, 2051
Sodium hypochlorite

Cantaloupe sanitization, 1805
Comparison of fog and foam sanitization procedures, 592
Tolerance of pathogens to cleaning treatments, 2289
Sodium lactate
Control of clostridia in turkey, 1474
Sodium metabisulfite
Inactivation of *Salmonella* in dried apples, 2245
Soil
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Soil microfauna
Interactions of *C. elegans* with soil microfauna, 1543
Solid-phase extraction
Carbaryl and napthol detection in fruit juice, 1510
Solid-phase microextraction (SPME)
Enantiomeric excesses of terpenes in juices, 1448
Somatic group
PCR-ELISA for *Salmonella* detection, 2367
Sonication
EO water for inactivation of *Salmonella* on alfalfa sprouts, 208
Sorting
Aflatoxin reduction, 1879
Source
E. coli in apple cider and the cider production environment, 2237
Soybean oil
Mutagenicity of fumes from fried chicken legs, 1269
Spain
PCBs in foods from Catalonia, Spain, 479
Species identification
Discriminant PCR for detection of terrestrial animals in fish meal, 682
Hake species identification, 2130
PCR assay for detection of animal tissue in feeds, 2307
Spices
Effect of spices and herbs on *Shigella*, 668
Spinach
E. coli in growing spinach, 1790
Spoilage
Investigating natamycin derivative's ability to prevent cheese molding, 1499
Modeling quality loss in poultry, 280
Spore
B. anthracis and contamination of food, 691
Sporeformer
Control of clostridia in turkey, 1474
Spore germination
C. botulinum growth in vegetables, 833
Spores
Bacillus heat resistance and hydrophobicity on stainless steel, 2070
C. perfringens in cured meats, 72
Detection and fate of *B. anthracis* (Sterne) spores in raw milk, 2349
Spring water
Enteroaggregative *E. coli* in bottled water, 497
Sprouts
Bean and green sprout production, 1253
E. coli O157:H7 and *Salmonella* on alfalfa seed, 1158
Irradiation control of *E. coli* O157:H7 and *Salmonella* on alfalfa seed, 175
Irradiation control of *E. coli* O157:H7 and *Salmonella* on broccoli seeds, 760
Salmonella outbreak associated with alfalfa sprouts, 13
Stability
Detection and fate of *B. anthracis* (Sterne) spores in raw milk, 2349
Stability and efficacy of EO water against pathogens, 1379
Staphylococcal enterotoxin B
Cytometric assay for staphylococcal enterotoxin B, 1222
Detection of SEB in food, 1851
Staphylococcus
Antibiotic resistance in *Micrococcaceae*, 937
Staphylococcus aureus
Managing staphylococcal risk with FSOs, 1310
Microbes in river lampreys, 2332
Modeling biofilm formation, 1432
Multiplex PCRs for detection of enterotoxigenic *S. aureus*, 1055
S. aureus and *Salmonella* Enteritidis survival on salted sardines, 1479
S. aureus enterotoxin from mastitic cows, 1693
Tolerance of pathogens to cleaning treatments, 2289
Staphylococcus aureus enumeration
Petrifilm Staph Express Count method for *S. aureus* enumeration, 2151
Starvation
L. monocytogenes on RTE meats inoculated with a dustlike vector, 962
Stress responses of *E. coli* O157:H7 during starvation, 2045
Thermal inactivation model for starved *L. monocytogenes*, 1216
Steam distillation–solvent extraction (SDE)
Enantiomeric excesses of terpenes in juices, 1448
Storage
Inactivation of *Salmonella* in dried apples, 2245
Irradiation and cryotolerance of *Salmonella*, 1916
Irradiation of *L. monocytogenes* on endive, 993
Microbes in river lampreys, 2332
Survival of *Salmonella* on beef jerky during storage, 396
UV-A light and tomato fruit injury, 2168
Viability of *Campylobacter* on chicken and pork skins, 2023
Storage life
Storage life, safety, moisture-enhanced pork, 293
Strain variation
Inactivation, growth, and survival of *L. monocytogenes*, 1611
Stress
Listeria growth under stress, 1208
PEF and heat inactivation of stress-adapted *E. coli* O157:H7, 755
STX production by *E. coli* O157:H7, 970
Stress proteins
Acid and bile juice response in *V. cholerae*, 2283
Sublethal injury
Sublethal injury induced by preservation treatments, 31
Subtypes
Prevalence and types of *L. monocytogenes*, 1413
Sunflower oil
Mutagenicity of fumes from fried chicken legs, 1269
Surface tension
A model to predict loss of hermetic seal in liquid food packages, 1260
Surveillance
Parsley-associated *Shigella* and *E. coli* outbreaks, 535
Salmonella in pigs and pork, 1126
Survival
E. coli O157:H7 survival in dry sausages, 2267
Factors affecting survival of *Campylobacter*, 2032
Inhibition of *L. monocytogenes* in liquid whole egg, 999
Microbial interaction and death of *E. coli* in fermenting olives, 1166
Protection of nutraceutical bacteria, 2076
S. aureus and *Salmonella* Enteritidis survival on salted sardines, 1479
Survival of *Campylobacter* and *Salmonella* on surfaces, 1587
Survival of pathogens in detergents, 1462
Survival of *Salmonella* in waste egg wash water, 233
Viability of *Campylobacter* on chicken and pork skins, 2023
Susceptibility
Antibiotic resistance of bacteria from poultry products, 94
Sweep resonance test
A model to predict loss of hermetic seal in liquid food packages, 1260
Swine
Competitive exclusion of *Salmonella*, 1353
Detection of *Salmonella*, 518
Prevalence of *Campylobacter* in swine, 1550
Prevalence of *Salmonella* in cull sows, 1134
Switzerland
Safety assurance for *Salmonella* spp.: a semiquantitative approach, 1146
Synergistic spore killing
UV-peroxide killing of spores, 1233
Synthetic gastric fluid
Stress tolerance of *S. enterica* serovar Typhimurium DT104, 1115

TaqMan

Potato and tomato PCR identification, 1063
TBA
COP and lipid oxidation in raw and cooked chicken breast, 840
tdh
Improved PCR for *tdh* detection, 1675
V. parahaemolyticus variability in oysters, 125
TEFs
PCB intake from fish: evaluation of the dietary risk, 2176
Temperature
C. perfringens in cooling of cooked ham and beef, 1599
Listeria growth under stress, 1208
Microbes in river lampreys, 2332
Weibull-based inactivation model, 978
Terpenes
Enantiomeric excesses of terpenes in juices, 1448
Tetrodotoxin
TTX-associated snail poisoning, 110
Thermal inactivation
E. coli O157:H7 in compost, 1771
Effect of lactate on thermal inactivation of *E. coli* O157:H7, 664
Lethality of *Listeria* in chicken products, 578
Pasteurization of RTE turkey products, 1618
Thermal tolerance
Stress responses of *E. coli* O157:H7 during starvation, 2045
Threshold imposed pressure
Loss of hermetic seal as affected by microorganism characteristics, 1716
Threshold leak size
A model to predict loss of hermetic seal in liquid food packages, 1260
Threshold pressure
A model to predict loss of hermetic seal in liquid food packages, 1260
Thyme
Effect of essential oils on sea bass shelf life, 410
Time-temperature integrator
Modeling quality loss in poultry, 280
Time-temperature integrators track poultry quality, 287
tlh
V. parahaemolyticus variability in oysters, 125
Tolerance
Tolerance of pathogens to cleaning treatments, 2289
Tomatillo
Attachment of *Salmonella* on tomatoes and tomatillos, 1756
Tomato
Antimicrobial performance of alkaline ionic fluid (GC-100X), 1604
Attachment of *Salmonella* on tomatoes and tomatillos, 1756
Inactivation of bacteria on tomatoes by electrolyzed acidic water, 542
M. incognita infection does not assist *Salmonella*, 1459
Potato and tomato PCR identification, 1063
Proteolytic fungi on raw tomatoes, 911
Tomato fruit
UV-A light and tomato fruit injury, 2168
Topinambur
Effects of Jerusalem artichokes on broiler chickens, 2171
Toxicity
Aflatoxin contamination in shrimp feed, 882
TTX-associated snail poisoning, 110
Toxin adsorption
Adsorption and desorption of AFB_1 by bacteria, 426
Toxin desorption
Adsorption and desorption of AFB_1 by bacteria, 426
Trace elements
Trace elements in Slovenian poultry tissues, 686
Transmissible spongiform encephalopathy
Role of ANS in transfer of PrP^{res}, 890
Tremorgenic mycotoxins
Genotoxicity of tremorgenic mycotoxins, 2123
Trichinella
Comparison of a modified digestion assay with trichinoscopy, 1043
Trichinella nativa
Infectivity of *T. nativa* in country foods, 1857
Trichinoscopy
Comparison of a modified digestion assay with trichinoscopy, 1043
Trisodium phosphate
Effectiveness of TSP on chicken skin, 61
Tryptic hydrolysis
Inhibition of angiotensin converting enzyme by κ-casein macropeptide, 1686
Tuna roe
Amines in dried and salted tuna roe, 335
Turkey
Control of clostridia in turkey, 1474
23S rRNA
Salmonella detection by fish, 723

Ultrasound
Ultrasound and heat decontamination, 1642
Undeclared
Undeclared peanut protein in imported chocolates, 1932
UV-A
UV-A light and tomato fruit injury, 2168
UV irradiation
UV-peroxide killing of spores, 1233
UV light
Response of bacterial pathogens to ultraviolet energy, 1071

Vacuum package
COP and lipid oxidation in raw and cooked chicken breast, 840
Lethality of *Listeria* in chicken products, 578
Phosphate dip for poultry, 1701
Storage life, safety, moisture-enhanced pork, 293
Vacuum skin packaging of retail cuts of beef, 2085
vanA
Isolation of vancomycin-resistant *E. faecalis* from beef, 1845
Vancomycin resistance
Isolation of vancomycin-resistant *E. faecalis* from beef, 1845
Variability
V. parahaemolyticus variability in oysters, 125
Vegetable(s)
C. botulinum growth in vegetables, 833
E. coli O157:H7 in produce, 18
Irradiation of *L. monocytogenes* on endive, 993
Vero cells
Arcobacter in retail meats, 1374
Verocytotoxin-producing *Escherichia coli*
VTEC in food processing environments, 1576
Verotoxin
STX production by *E. coli* O157:H7, 970
Viability
Acid and peroxide treatment of *C. parvum* oocysts, 1650
Viability disinfectants
Fluorescent probes for viability assessment, 1393
Vibrio cholerae
Acid and bile juice response in *V. cholerae*, 2283
Vibrio parahaemolyticus
Improved PCR for *tdh* detection, 1675
V. parahaemolyticus variability in oysters, 125
Vibrios
Vibrio response to high-pressure processing, 2276
Vibrio spp.
Irradiation of oysters, 1025
Vibrio vulnificus
Diacetyl-assisted depuration in oysters, 38
Vinegar
Reducing *Salmonella* on apples, 741
Treatments for the natural microbiota of lettuce, 1697
Virulence factors
Virulence aspects of *E. sakazakii*, 370
Vitamins
Fermentation of cowpea flours, 2313
Vitelline membrane
Salmonella Enteritidis growth on the vitelline membrane, 1368

Wash
Reducing *Salmonella* on apples, 741
Waste stream
Survival of *Salmonella* in waste egg wash water, 233
Water quality
Bacterial contamination of cantaloupe and honeydew melon rinds, 82
Weep
Weep and carcass rinse comparison for *Campylobacter* recovery, 1720
Weibull model
Weibull-based inactivation model, 978
Whole broilers
Whole-carcass enrichment, 1768
Whole-carcass enrichment
Whole carcass enrichment, 446
Withdrawal period
Antibiotic residue persistence in ewe's milk, 2097

Xenia
Aspergillus ear rot and aflatoxin in corn hybrids, 637

Yeast(s)
Essential oils activity against food spoilage yeasts, 625
Inactivation of *S. cerevisiae* with RFEFs, 1712
Proteolytic fungi on raw tomatoes, 911
Yellow fat spreads
Viability of pathogens in yellow fat products, 549
